

ISO 19014-1:2018 (E)

Earth-moving machinery — Functional safety — Part 1: Methodology to determine safety-related parts of the control system and performance requirements

Contents

	Foreword	
	Introduction	
1	Scope	
2	Normative references	
3	Terms and definitions	
4	Method to determine MPLr for SRP/CS of earth moving machinery	
4.1	General	
4.2	Machine Control System Safety Analysis (MCSSA) method	
5	Requirements for immediate action warning indicators	
5.1	General	
6	Performance level determination procedures	
6.1	General	
6.2	Participants in the risk assessment	
6.3	Assessment and classification of a potential harm	
6.4	Assessment of exposure in the situation observed	
6.5	Assessment of a possibility to avoid harm	
6.6	Determining the required MPL	
Annex A	(informative) Process flow chart for machinery risk assessment	
Annex B	(informative) Table of warning/operation indicators	
Annex C	(informative) Example of MCSSA Process	
Annex D	(informative) List of possible safety control systems (SCS) of earth moving machines
