

# ISO/TS 18101-1:2019 (E)

## Automation systems and integration — Oil and gas interoperability — Part 1: Overview and fundamental principles

---

### Contents

|         |  |
|---------|--|
|         | Foreword   |
|         | Introduction   |
| 1       | Scope  |
| 2       | Normative references   |
| 3       | Terms and definitions  |
| 4       | Abbreviated terms  |
| 5       | Overview and general requirements                                  |
| 5.1     | Secondary business process   |
| 5.2     | Systems of systems interoperability                                |
| 5.3     | Industrial digital ecosystem architecture                          |
| 5.3.1   | Overview   |
| 5.3.2   | Engineering Systems  |
| 5.3.3   | Enterprise Business Systems and Automation and Control Systems     |
| 5.3.4   | Data Quality and Architecture                                      |
| 5.4     | Inter-enterprise user stories                                      |
| 6       | Compliance and conformance   |
| 7       | OGI concept map  |
| Annex A | (normative) IT/OT Cloud and Standardized Use Case Architecture     |
| A.1     | Application domains in the IT/OT cloud                             |
| A.2     | OIIIE use case architecture  |
| A.3     | Use cases  |
| A.4     | Scenarios  |
| A.5     | Events   |
| A.6     | User stories   |
| A.7     | Use case data model  |
| Annex B | (informative) OGI activity model                                   |
| Annex C | (informative) Relationships between selected data standards        |
| Annex D | (informative) OpenO&M Initiative and Associated Industry Standards |
