ISO 15003:2019-11 (E)

Agricultural engineering - Electrical and electroni c equipment - Testing resistance to environmental conditions

Contents

Page

Foreword ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **2**

4 General **2**
4.1 General conditions for testing 2
4.2 Test sequence 3
4.3 Test report 3
4.4 ISO 16750 conformance 3

5 Tests **3**
5.1 Monitoring for impaired function 3
5.2 Cold and dry heat 4
5.2.1 Changes of temperature with specified rate of change 4
5.2.2 Temperature shock 5
5.3 Damp heat, steady-state 7
5.3.1 Test method 7
5.3.2 Test limits 7
5.4 Damp heat, cyclic 7
5.4.1 Test method 7
5.4.2 Test limits 9
5.5 Impact 9
5.5.1 Particle impact 9
5.5.2 Mechanical shock 9
5.6 Vibration 10
5.6.1 Random vibration test 10
5.6.2 Sinusoidal (resonance) test 11
5.7 Corrosive atmosphere 12
5.7.1 Test method 12
5.7.2 Test limits 12
5.8 Degrees of protection provided by enclosures (IP Code) 12
5.8.1 Dust — Test method/test limits 12
5.8.2 Water spray — Test method/test limits 12
5.9 Air pressure (altitude) 12
5.9.1 Test method 12
5.9.2 Test limits 13
5.10 Chemical brush or spray 13
5.10.1 Test method 13
5.10.2 Test limits 14
5.11 Solar radiation (ultraviolet) 14
5.11.1 Test method 14
5.11.2 Test limits 14
5.12 Readability of display devices 14
5.12.1 Test method 14
5.12.2 Test limits 15
5.13 Electromagnetic compatibility 15
5.13.1 Susceptibility and emissions — Test method/limits 15
5.14 Electrical environment 15
5.14.1 Operating voltage 15
5.14.2 Over-voltage — Test method/limits 15

5.14.3 Reverse polarity — Test method/limits 15
5.14.4 Short circuit — Test method/limits 16
5.14.5 Battery-less operation — Test method/limits 16
5.14.6 Transient supply — Test method/limits 16
5.14.7 Electrostatic discharge — Test method/limits 16
Annex A (informative) **Example test report** **17**
Annex B (informative) **Machinery/equipment codes and guidance for use of severity levels** **18**
Annex C (informative) **Corresponding tests in ISO 16750** **22**
Bibliography **23**
