DIN 3990-16:2020-05 (E)

Calculation of load capacity of cylindrical gears - Part 16: Determination of the micro-pitting load-carrying capacity of lubricants using FZG-tes t-method GT-C/8,3/90

Contents

Page

Foreword ... 4

Introduction ... 5

1 Scope ... 5

2 Normative references ... 5

3 Terms and definitions ... 6

4 Symbols and abbreviated terms ... 8

5 Brief description of test method and general principles ... 10

6 Precision ... 14
6.1 Precision in the load stage test ... 14
6.2 Precision in the endurance test ... 14

7 Test materials ... 14
7.1 Test gears ... 14
7.2 Cleaning fluid ... 16

8 Apparatus ... 16
8.1 FZG gear test rig ... 16
8.2 Oil supply ... 18
8.3 Involute profile tester ... 18
8.4 Balance ... 18
8.5 Tooth flank gauge ... 18
8.6 Photographing device ... 19
8.7 Heating device ... 19
8.8 Degaussing device ... 19

9 Preparation of the FZG gear test rig ... 19
9.1 General ... 19
9.2 Cleaning of the test gear box ... 19
9.3 Cleaning of the oil circuit ... 19
9.4 Inspection for damage ... 20
9.5 Preparation of the test gears ... 20
9.6 Assembly of the test gears ... 20
9.7 Loading of the FZG gear test rig ... 20

10 Test method ... 22
10.1 General procedure ... 22
10.2 Detailed procedure ... 23
10.3 General operating data ... 24
10.4 Test conditions in the load stage test ... 25
10.5 Test conditions of the endurance test ... 25

11 Documenting the test ... 26
11.1 Values to be documented ... 26
11.2 Measuring methods/measuring conditions ... 26
11.2.1 Roughness measurement in new condition ... 26

11.2.2 Selection of the teeth to be documented during the test ... **27**
11.2.3 Visual documentation/ mean micropitted area after each load stage and test interval ... **27**
11.2.4 Determination of the mean profile deviation ... **27**
11.2.5 Determination of the mass loss ... **28**
12 Determination of the failure progress in load stage test and endurance test ... **28**
13 Determination of the failure load stage of the micropitting test ... **33**
14 Test report ... **34**
Annex A (informative) **Example of a test report and a value table** ... **35**
Annex B (informative) **Determination of the micropitting load-carrying capacity class** ... **37**
Annex C (informative) **Examples of curves of the micropitting development** ... **40**
Annex D (informative) **Example of a classification into a GF class** ... **43**
Annex E (informative) **Conversion of test results with deviating flank roughness according to FVA 54/7** ... **44**
Annex F (informative) **Examples of flank characteristics for GF classes according to FVA 54/7** ... **46**
Annex G (normative*)) **Explanations and supplements to the description of the FZG gear test rig** ... **49**
Annex H (informative) **Checklist for maintenance of FZG gear test rig** ... **52**
H.1 How to recognize a malfunction ... **52**
H.1.1 Distribution of micropitting on the flank ... **52**
H.1.2 Tooth contact pattern ... **52**
H.1.3 Tests with reference oil ... **52**
H.1.4 Other indications ... **52**
H.2 Parts that need maintenance ... **52**
H.2.1 Test gearbox ... **52**
H.2.2 Connecting shafts and flanges ... **53**
H.2.3 Slave gearbox ... **54**
H.2.4 Other parts ... **54**
H.3 Oil supply ... **55**
Bibliography ... **56**
