|---------|-------------------------------------------------------------------------------------------------------------------------------------|
|         | Foreword                                                                                                                            |
| 1       | Scope                                                                                                                               |
| 2       | Normative references                                                                                                                |
| 3       | Terms and definitions                                                                                                               |
| 4       | General requirements                                                                                                                |
| 5       | Machine requirements for test                                                                                                       |
| 6       | Specific performance tests                                                                                                          |
| 6.1     | General                                                                                                                             |
| 6.2     | Selection of crops                                                                                                                  |
| 6.3     | Reference machine                                                                                                                   |
| 6.4     | Operator competence                                                                                                                 |
| 6.5     | Preparations for performance tests                                                                                                  |
| 6.6     | Instrumentation and test apparatus                                                                                                  |
| 6.7     | Test procedure                                                                                                                      |
| 6.7.1   | Output and specific energy requirement tests                                                                                        |
| 6.7.2   | Front end losses                                                                                                                    |
| 6.7.3   | Length of cut analysis                                                                                                              |
| 7       | Test report                                                                                                                         |
| 7.1     | Basic information                                                                                                                   |
| 7.2     | Additional information and observations                                                                                             |
| 7.2.1   | General                                                                                                                             |
| 7.2.2   | Basic records                                                                                                                       |
| 7.2.3   | Assessment procedure                                                                                                                |
| 7.2.3.1 | General                                                                                                                             |
| 7.2.3.2 | All forage harvesters                                                                                                               |
| 7.2.3.3 | Self-propelled forage harvesters                                                                                                    |
| 7.2.4   | Durability and reliability                                                                                                          |
| 7.2.5   | Effectiveness of safety provisions                                                                                                  |
| Annex A | (informative) Determination of geometric mean length of cut and geometric standard deviation from results of length of cut analysis |
| A.1     | Rationale                                                                                                                           |
| A.2     | Calculation of cut parameters                                                                                                       |
| A.2.1   | Geometric mean length, $\bar{x}$                                                                                                    |
| A.2.2   | Geometric standard deviation, $\sigma$                                                                                              |
| A.2.3   | Calculation procedure                                                                                                               |
| A.3     | Length of cut parameters – Graphical determination                                                                                  |
| A.3.1   | General                                                                                                                             |
| A.3.2   | Geometric mean length, $\bar{x}$                                                                                                    |
| A.3.3   | Geometric standard deviation, $\sigma$                                                                                              |
| A.4     | Example of determination of $\bar{x}$ and $\sigma$                                                                                  |
| A.4.1   | Mass distribution                                                                                                                   |
| A.4.2   | Calculated values of $\bar{x}$ and $\sigma$                                                                                         |
| A.4.2.1 | Arithmetic mean length in class interval                                                                                            |
| A.4.2.2 | Geometric mean length in class interval                                                                                             |
| A.4.2.3 | Values found from graph of data in Figure A.1                                                                                       |
| A.5     | Interquartile range                                                                                                                 |
