ISO 12003-1:2021 (E)

Tractors for agriculture and forestry — Roll-over protective structures on narrow tractors — Part 1: Front-mounted ROPS

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols

5 Test apparatus and equipment

5.1 Apparatus for both dynamic and static testing
5.1.1 Clearance zone framework
5.1.2 Apparatus for crushing tests
5.1.3 Rear hard fixture test rig
5.2 Apparatus for dynamic testing
5.2.1 Device to strike a blow against the front-mounted ROPS
5.2.2 Pendulum supports
5.2.3 Means of lashing the tractor to the ground
5.2.4 Wheel beam
5.2.5 Wheel prop
5.2.6 Props and lashings for articulated tractors
5.2.7 Tyre pressures and deflection
5.2.8 Device to measure elastic deflection
5.3 Apparatus for static testing

6 Preparation of tractor and ROPS for testing

7 ROPS deflection preliminary tests

7.1 General requirements
7.2 Lateral stability test
7.3 Non-continuous rolling test
7.3.1 General
7.3.2 Demonstration of non-continuous rolling behaviour by means of the overturning test
7.3.3 Demonstration of non-continuous rolling behaviour by calculation

8 ROPS deflection test procedures

8.1 General requirements
8.2 Test methods
8.3 Test sequence
8.4 Rear fixture test procedure
8.5 Dynamic (impact) test procedures for front-mounted ROPS
8.5.1 Rear impact test procedure
8.5.2 Front impact test procedure
8.5.3 Side impact test procedure
8.5.4 Additional impact tests
8.6 Static test procedures for front-mounted ROPS
8.6.1 Test preparation
8.6.2 General requirements for horizontal loading test procedures
8.6.3 Rear loading
8.6.4 Front loading

8.6.5 Side loading
8.7 Vertical crushing test procedure
8.8 Additional vertical crushing tests
8.9 Observations during testing
8.9.1 Fractures and cracks
8.9.2 Clearance zone
8.9.3 Recording permanent deflection

9 Determination of seat index point (SIP), seat location and adjustment for test

9.1 General
9.2 Seat location and adjustment for tests

10 Clearance zone

10.1 General
10.2 Clearance zone for tractors with a non-reversible seat
10.3 Clearance zone for tractors with a reversible driving position
10.4 Optional seats

11 Tolerances

12 Acceptance conditions

12.1 General
12.2 Clearance zone
12.3 Seat anchorage performance
12.4 Folding ROPS performance
12.5 After impact loads
12.6 After static horizontal loads
12.7 Additional conditions
12.8 Cold weather embrittlement

13 Seatbelt anchorage test procedures

14 Folding ROPS

15 Labelling

16 Extension to other models

16.1 Administrative extension
16.2 Technical extension
16.2.1 General
16.2.2 Extension of the structural test results to other models of tractors
16.2.3 Extension of the structural test results to modified models of the protective structure
16.2.4 Type extension limits
16.2.5 Increase of the declared reference mass

17 Test report

Annex A (normative) Requirements for providing resistance to brittle fracture of front-mounted ROPS at a reduced operation temperature

Annex B (informative) Folding ROPS test procedures

Annex C (normative) Test report for front-mounted ROPS

C.1 General
C.2 Specification of test tractor
C.2.1 Identification of tractor to which a front-mounted ROPS is fitted for the test
C.2.1.1 General
C.2.1.2 Numbers
C.2.2 Tractor mass
C.2.3 Wheelbase and moment of inertia
C.2.4 Test tyre and track settings
C.2.5 Tractor seat
C.3 Specification of front-mounted ROPS
C.4 Test results

C.4.1 Preliminary tests of lateral stability and non-continuous rolling
C.4.1.1 General
C.4.1.2 Lateral stability test
C.4.1.3 Non-continuous rolling test
C.4.1.3.1 General
C.4.1.3.2 Demonstration of non-continuous rolling by means of the overturning test
C.4.1.3.3 Demonstration of non-continuous rolling by means of calculation
C.4.2 Impact and crushing tests
C.4.2.1 Condition of tests
C.4.2.2 Permanent deflections measured after the tests
C.4.2.3 Curves (static test only)
C.4.3 Cold weather performance (resistance to brittle fracture)
C.4.4 Tractor(s) to which the protective structure is fitted
C.4.5 Seat belt anchorage performance
C.4.5.1 Loading in the forward and upward direction
C.4.5.2 Loading in the rearward and upward direction
C.4.5.3 Curves, drawings and photos
C.5 Minor modification test report
C.5.1 Specification of the protective structure
C.5.2 Denomination of tractors to which the protective structure is fitted
C.5.3 Details of modifications
C.5.4 Statement

Annex D (normative) Non-continuous rolling test procedure — Calculation method

D.1 General
D.2 Required data
D.3 Simplifying assumptions
