DIN EN ISO 13577-2:2024-09 (E)

Industrial furnaces and associated processing equipment - Safety - Part 2: Combustion and fuel handling systems (ISO 13577-2:2023)

Contents

Page

European foreword ... **5**

Foreword ... **6**

Introduction ... **7**

1 Scope ... **8**

2 Normative references ... **9**

3 Terms and definitions ... **11**

4 Safety requirements, measures and verification means ... **11**

4.1 General ... 11

4.1.1 Safety objectives and basic requirements ... 11

4.1.2 Over-temperature protection ... 12

4.1.3 Accumulation of hazardous fluids ... 13

4.1.4 Seismic protection ... 13

4.1.5 Regional requirements ... 13

4.2 Fuel pipework ... 13

4.2.1 General ... 13

4.2.2 Connections ... 13

4.2.3 Unconnected pipework ... 15

4.2.4 Galvanic cells ... 15

4.2.5 Flexible tubing and couplings ... 15

4.2.6 Marking ... 15

4.2.7 Soundness/tightness ... 15

4.2.8 Condensate drains on gas pipework ... 17

4.2.9 Fuel pipe heating ... 17

4.2.10 Purge points ... 17

4.2.11 Pressure relief devices ... 17

4.2.12 Blow-off and breather pipes or conduits ... 17

4.2.13 Equipment supplied with different fuels ... 18

4.2.14 Bypass ... 18

4.2.15 Isolation of required safety devices ... 18

4.3 Required safety devices for gaseous fuels ... 18

4.3.1 Manual isolating valve ... 18

4.3.2 Filter/strainer ... 18

4.3.3 Gas pressure regulator ... 19

4.3.4 Low gas pressure protection ... 19

4.3.5 High gas pressure protection ... 20

4.3.6 Automatic shut-off valves ... 20

4.3.7 Valve proving ... 21

4.3.8 Individual manual shut-off valves for burners ... 22

4.3.9 Flame arrestor ... 22

4.4 Gas pressure boosters ... 22

4.5 Required safety devices for liquid fuels ... 23

4.5.1 Manual isolating valve ... 23

4.5.2 Filter/strainer ... 23

4.5.3 Pressure relief valve ... 23

4.5.4 Liquid fuel pressure regulator ... 23

4.5.5 Pressure regulation of auxiliary fluids ... 23

4.5.6 Liquid fuel and auxiliary fluid pressure protection ... 23
4.5.7 Liquid fuel temperature protection ... 23
4.5.8 Automatic shut-off valves ... 24
4.5.9 Automatic shut-off valves for multiple burners ... 24
4.5.10 Individual manual shut-off valves for multiple burners ... 24
4.6 Combustion air and fuel/air ratio ... 25
4.6.1 Combustion air system ... 25
4.6.2 Air flow and pressure sensing devices ... 25
4.6.3 Air/fuel ratio ... 26
4.7 Supply of pre-mixed fuel gas/air ... 26
4.7.1 Mixture pipework ... 26
4.7.2 Air and gas supply to the mixture circuit ... 26
4.8 Liquid fuel atomisation ... 27
4.9 Burners ... 27
4.9.1 Main burners ... 27
4.9.2 Radiant tube burner systems ... 27
4.9.3 Ignition device/pilot burner ... 27
4.9.4 Permanent pilots ... 28
4.9.5 Burner capacity control ... 28
4.9.6 Flue gas venting ... 28
4.9.7 Purge of residual fuel ... 28
4.10 Automatic burner control systems ... 28
4.10.1 General ... 28
4.10.2 Low-temperature equipment ... 29
4.10.3 High-temperature equipment ... 29
4.10.4 Automatic burner control systems for burners operating in the open air ... 30
4.10.5 Flame supervision for line-burners ... 30
4.11 Start-up of the heating system and burner ignition ... 30
4.11.1 Pre-purging of the combustion chamber ... 30
4.11.2 Start-up of the fuel supply ... 32
4.11.3 Start fuel flow rate ... 32
4.11.4 Ignition ... 32
4.11.5 Maximum safety times for gas-fired natural draught burners ... 32
4.11.6 Maximum safety times for forced and induced draught gas-fired burners ... 33
4.11.7 Maximum safety times for liquid fuel fired burners ... 34
4.11.8 Flame failure on start-up ... 35
4.11.9 Flame failure during operation ... 35
4.12 Multiple fuels ... 36
4.12.1 General ... 36
4.12.2 Fuel circuit ... 36
4.12.3 Combustion air supplies ... 36
4.12.4 Operation of the safety devices ... 36
4.12.5 Air/fuel ratio ... 36
4.13 Oxygen or oxygen-enriched combustion air (OOECA) ... 36
4.13.1 General ... 36
4.13.2 Suitability for oxygen service ... 37
4.13.3 Pipework ... 37
4.13.4 Flow velocities ... 37
4.13.5 Connection for oxygen pipework ... 38
4.13.6 Sealing materials for oxygen pipework ... 38
4.13.7 Fittings ... 38
4.13.8 Blow off and venting lines ... 38
4.13.9 Flexible tubing and couplings ... 38
4.13.10 Safety devices against backflow ... 38
4.13.11 Material requirements ... 38

5 Verification of the safety requirements and/or measures ... 39

6 Information for use ... 43
6.1 General ... 43

6.2 Marking ... 43
6.3 Instruction handbook ... 43
6.3.1 General ... 43
6.3.2 Description of equipment ... 43
6.3.3 Inspection procedures ... 44
6.3.4 Commissioning, start-up and operating procedures ... 44
6.3.5 Shutdown procedures ... 44
6.3.6 Maintenance procedures ... 45
6.3.7 Documentation ... 45
Annex A (informative) **List of significant hazards** ... **46**
Annex B (informative) **Examples of fuels** ... **48**
Annex C (normative) **Maximum allowed pressure** ... **49**
Annex D (informative) **Examples for the determination of safety integrity level (SIL) or performance level (PL) using the risk graph method** ... **54**
Annex E (normative) **Regional product standards** ... **65**
Annex F (informative) **Example for manual leak check of automatic shut-off valves** ... **70**
Annex G (informative) **Example of piping and components** ... **72**
Annex H (informative) **Methods for burner start-up** ... **83**
Annex I (informative) **Requirements specific to Japan** ... **98**
Annex J (informative) **Requirements specific to the USA** ... **102**
Annex K (informative) **Requirements for Europe and associated countries** ... **106**
Bibliography ... **109**
