

ISO 11171:2022-03 (E)

Hydraulic fluid power - Calibration of automatic particle counters for liquids

Contents		Page
Foreword		iv
Introduction		vi
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Materials and equipment		3
5 Sequence of APC calibration procedures		5
6 Sizing calibration procedure		9
7 Data presentation		19
8 Identification statement		20
Annex A (normative) Preliminary APC check		21
Annex B (normative) Coincidence error procedure		25
Annex C (normative) Flow rate limit determination		29
Annex D (normative) Resolution determination		34
Annex E (normative) Verification of particle-counting accuracy		39
Annex F (normative) Preparation and verification of bottles of secondary calibration suspensions		42
Annex G (normative) Dilution of calibration suspension samples		46
Annex H (informative) Verification of particle size distribution of calibration samples		49
Bibliography		51
