ISO 8528-6:2023-11 (E)

Reciprocating internal combustion engine driven alternating current generating sets - Part 6: Test methods

Contents

Page

Foreword v

1 Scope 1

2 Normative references 1

3 Terms,definitionsandabbreviations 2
3.1 Terms and definitions 2
3.2 Abbreviated terms 7

4 Other regulations and additional requirements 8

5 General test requirements 8
5.1 General 8
5.2 Measurement equipment accuracy 9

6 Functional test 10
6.1 General 10
6.1.1 General 10
6.1.2 Physical functional test 10
6.1.3 Functional test by simulation 10
6.2 General inspection 10
6.3 Measurements 11
6.4 Functional test report 11

7 Type test 12
7.1 General 12
7.2 Testing conditions 12
7.3 Characterisation of performance class 13
7.3.1 Steady state verification at constant power 13
7.3.2 Verification of power-sharing capability 14
7.3.3 Step load test 15
7.3.4 Start and stop time characteristics 16
7.4 Reactive power capability 18
7.4.1 General 18
7.4.2 Verification of reactive power capability 18
7.4.3 Test method for verification of reactive power capability control methods 20
7.5 Verification of grid synchronization limits 24
7.5.1 General 24
7.5.2 Testing method for verification of grid synchronisation limits 24
7.6 Test method for verification of FRT capability 25
7.6.1 General 25
7.6.2 Aim of the test 25
7.6.3 Documents to be provided before test 25
7.6.4 Test method 26
7.6.5 Acceptance criteria 27
7.7 Test method for verification of active power response to frequency variation 27
7.7.1 General 27
7.7.2 Aim of the test 27
7.7.3 Documents to be provided before test 28
7.7.4 Test method 28

7.7.5 Acceptance criteria ... 29
7.8 Test method for verification of generating set protections ... 29
7.8.1 General ... 29
7.8.2 Verification of generating set disconnection time from the grid ... 29
7.8.3 Verification of protection limits ... 30

8 Simulation-method-based assessment ... 31
8.1 General ... 31
8.2 Specification of model blocks ... 32
8.2.1 General ... 32
8.2.2 Engine and engine controller or governor block ... 32
8.2.3 AC generator block ... 33
8.2.4 Generating set controller block ... 33
8.2.5 Excitation controller (AVR) block ... 33
8.2.6 Exciter block ... 33
8.2.7 Protective devices block ... 33
8.2.8 Measurement transformer (if applicable) ... 34
8.3 Simulation for ISO performance class in standalone island operation ... 34
8.3.1 General ... 34
8.3.2 Model validation for standalone island mode ... 34
8.4 Simulation for generating sets used in grid connected applications ... 36
8.4.1 General ... 36
8.4.2 Requirements and methodologies for model validation ... 36
8.4.3 Model validation for different grid requirements ... 37
8.5 Assessment for generating set family ... 41
8.5.1 Methodology ... 41
8.5.2 Assessment for ISO performance class for family ... 41
8.5.3 Assessment for type test for family in grid parallel application ... 41

9 Acceptance test ... 42
9.1 General ... 42
9.2 Responsibility ... 42
9.3 Preparation ... 42
9.3.1 Provision of auxiliary personnel, test equipment and operating materials ... 42
9.3.2 Acceptance test preparation at the installation site ... 43
9.3.3 Acceptance test preparation at the manufacturer's site or facility ... 43
9.3.4 Preliminary safety checks on generating set prior to testing ... 43
9.4 Further details ... 43
9.5 Extent of acceptance test ... 44
9.5.1 General ... 44
9.5.2 Checks (C) ... 44
9.5.3 Measurements (M) ... 45
9.6 Accuracy of measurement equipment and acceptance test procedure ... 46
9.6.1 Measurement equipment accuracy ... 46
9.6.2 Warm-up time ... 46
9.6.3 Generating set load test duration ... 47
9.6.4 Performing acceptance tests at the manufacturer's works ... 47
9.6.5 Installation site acceptance test ... 47
9.7 Acceptance test report ... 48
9.7.1 General ... 48
9.7.2 General data ... 48
9.7.3 Additional measured data for acceptance test ... 50

Annex A (informative) Test method using OVRT/UVRT test equipment ... 51

Annex B (informative) Test method for frequency ride through requirements ... 58

Annex C (informative) Example load step test report ... 63

Bibliography ... 65
