

ISO 8000-210:2024-12 (E)

Data quality - Part 210: Sensor data: Data quality characteristics

Contents

Page

- Foreword..... iv
- Introduction v
- 1 Scope 1
- 2 Normative references 1
- 3 Terms and definitions 1
- 4 Quality characteristics of sensor data 1
 - 4.1 General 1
 - 4.2 Accuracy 3
 - 4.3 Completeness 3
 - 4.4 Consistency 3
 - 4.5 Precision 3
 - 4.6 Timeliness 4
- 5 Types of anomaly in sensor data 4
 - 5.1 General 4
 - 5.2 Data anomalies for individual sensors 5
 - 5.2.1 General 5
 - 5.2.2 Offset 5
 - 5.2.3 Drift 6
 - 5.2.4 Trim 7
 - 5.2.5 Spike 8
 - 5.2.6 Noise 9
 - 5.2.7 Data loss 10
 - 5.2.8 Lack of amount 11
 - 5.2.9 Shift 12
 - 5.2.10 Drop or rise 13
 - 5.2.11 Stuck 14
 - 5.2.12 Bound oscillation 15
 - 5.2.13 Inconsistent frequency 16
 - 5.2.14 Different resolution 17
 - 5.2.15 Incorrect timestamp 18
 - 5.2.16 Latency 19
 - 5.3 Data anomalies for collections of multiple sensors 20
 - 5.3.1 General 20
 - 5.3.2 Dissimilarity 20
 - 5.3.3 Rule violation 21
 - 5.3.4 Inconsistent timestamp 22
- 6 Relationship between quality characteristics and data anomalies 23
- 7 Application of quality characteristics of sensor data 24
- Annex A (informative) Document identification 28
- Annex B (informative) Comparison with other documents 29
- Bibliography 32
