ISO 18464:2025-05 (E)

Hydraulic fluid power - Design methodology for energy efficient systems

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols and abbreviated terms 1

5 Design methodology 2
5.1 General 2
5.2 Application based actuator design 3
5.3 Actuator dimensioning 4
5.4 Control design 4
5.5 Design of hydraulic power supplies 4
5.6 Design of hydraulic power distribution (piping) 4
5.7 Selection of the hydraulic fluid 5
5.8 Auxiliary components 5
5.9 Calculation method of required energy supply 5
5.10 Rating and comparison method of energy consumption 6

Annex A (informative) Example overview of energy demand of duty cycle and different hydraulic system designs 7

Annex B (informative)Recommendationsforenergy-efficienthydraulicpiping 8
