DIN EN 1886:2026-09 (E)

Ventilation for buildings - Air handling units - Mechanical performance

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Requirements for the model box 9
4.1 General requirements 9
4.1.1 General 9
4.1.2 Model box with section joint 9
4.1.3 Model box without section joint 10
4.2 Reference to real unit or model box in classification 10

5 Mechanical strength of casing 11
5.1 General testing procedure 11
5.1.1 General 11
5.1.2 Classification of maximum pressure 12
5.2 Casing strength classification 13
5.3 Test preparation 14
5.4 Test procedure 18

6 External casing air leakage 21
6.1 Requirements and classification 21
6.1.1 General 21
6.1.2 Laboratory testing 22
6.1.3 Site testing of units operating under both negative and positive pressure 22
6.2 Testing 22
6.2.1 Test apparatus 22
6.2.2 Preparation for test 24
6.2.3 Test procedure 24
6.2.4 Determination of allowable leakage rates 25

7 Filter bypass leakage 25
7.1 Requirements 25
7.1.1 General 25
7.1.2 Acceptable filter bypass leakage rates 25
7.1.3 Two or more filter sections in the same unit 26
7.2 Testing 27
7.2.1 General 27
7.2.2 Filter blanking plates 27
7.2.3 Test procedure 28

8 Thermal performance - model box 30
8.1 General 30
8.2 Test setup and environment 31
8.3 Preparation of the model box 32
8.4 Test procedure 35
8.4.1 Thermal transmittance 35

8.4.2 Thermal bridging factor (kb) 35
8.5 Calculation 36
8.5.1 General 36
8.5.2 Calculation of the U-value 36
8.5.3 Calculation of the kb -value 36
8.6 Classification 37

9 Acoustic insulation of casing 38
9.1 General 38
9.2 Test requirements 38
9.3 Test method 38
9.4 Test procedure 38
9.5 Sound power insulation procedure 39
9.6 Uncertainty 40
9.7 Presentation of the sound reduction 40

Annex A (informative) Examples of arrangements of circulating fans 41

A.1 Installation of circulating fans 41
A.2 Four fans 41
A.3 Six fans 41
A.4 Eight fans 42

Annex B (normative) Test report 43

B.1 Test report 43
B.1.1 Requirement for test report 43
B.1.2 Recommendations for test report 43

Annex C (informative) Example calculation of the relative deflection Dr and the AHU casing class .. 47

C.1 General 47
C.2 Calculation of the non-permanent casing deflection and AHU casing class 47
C.3 Calculation of the permanent casing deflection and AHU casing class 49

Annex D (informative) Example of determining filter bypass leakage 51

Annex E (informative) Internal leakage in monoblock and sectional AHUs 52

Annex F (informative) General design advice for fire and mechanical safety 54

F.1 General 54
F.2 AHU materials 54
F.3 Mechanical safety 55
