

ISO/TS 8102-21:2026-02 (E)

Electrical requirements for lifts, escalators and moving walks - Part 21: On-site and off-site software updates

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms, definitions and abbreviated terms	1
3.1	Terms and definitions	1
3.2	Abbreviated terms	2
4	Overview of software update	2
4.1	General	2
4.2	EUC domains with relevant security and safety requirements	3
5	Management of software update	3
5.1	General	3
5.2	Requirements for software development	3
5.3	Requirements for the deployment of software update	3
5.3.1	Purpose of software update	3
5.3.2	Preparations for software update	3
5.4	Off-site software update management platform	4
5.4.1	Requirements for the service provider	4
5.4.2	Managing EUC configuration information	4
5.4.3	Processing software packages	4
6	Technical requirements of the software update	4
6.1	General	4
6.2	Initiation	5
6.3	Delivery	5
6.4	Protection of persons	5
6.4.1	Lifts	5
6.4.2	Escalators and moving walks	5
6.5	Compatibility check	5
6.5.1	General	5
6.5.2	Automatic compatibility check	5
6.5.3	Manual compatibility check	5
6.6	Activation	6
6.7	Validation	6
6.7.1	General	6
6.7.2	Automatic validation	6
6.7.3	Manual validation	6
6.8	Completion of software update	7
6.9	Recovery from validation failure	7
6.10	Auditing and reporting	7
6.10.1	EUC audit log	7
6.10.2	Off-site access to the EUC audit log	7
7	Information for use	7
Annex A (informative)	Comparison of on-site and off-site software updates	9
Annex B (informative)	Example of a software update sequence	12
Annex C (informative)	Product life cycle and EUC installation life cycle	14
