

IEC/TS 61400-4-1:2026-04 (E)

Wind energy generation systems - Part 4-1: Reliability assessment of drivetrain components in wind turbines

| Contents | Page |
|---|------|
| FOREWORD..... | 3 |
| INTRODUCTION | 5 |
| 1 Scope..... | 6 |
| 2 Normative references..... | 6 |
| 3 Terms, definitions, abbreviated terms, units and conventions | 7 |
| 3.1 Terms and definitions..... | 7 |
| 3.2 Abbreviated terms and units | 8 |
| 4 System reliability analysis model..... | 10 |
| 4.1 General | 10 |
| 4.2 Failure mode identification, classification, and system element assignment | 10 |
| 5 Component reliability analysis models | 12 |
| 5.1 Individual failure modes..... | 12 |
| 5.2 Gear reliability calculation | 12 |
| 5.2.1 General..... | 12 |
| 5.2.2 Estimation of service life for defined failure probabilities | 12 |
| 5.2.3 Extrapolation of failure probabilities to the design life | 16 |
| 5.3 Rolling bearing reliability calculation..... | 17 |
| 5.4 Shaft reliability calculation..... | 18 |
| Annex A (informative) Example reliability calculations | 20 |
| A.1 General | 20 |
| A.2 Example system reliability model..... | 20 |
| A.2.1 Identification of components..... | 20 |
| A.2.2 Identification of system elements | 20 |
| A.2.3 Classification and selection of system elements | 21 |
| A.2.4 Arrangement of reliability model and calculation of system reliability | 21 |
| A.2.5 Example system assumptions..... | 21 |
| A.3 Example gear tooth surface durability (pitting) reliability calculation | 22 |
| A.3.1 Example gear assumptions | 22 |
| A.3.2 Estimation of service life for defined failure probabilities | 22 |
| A.3.3 Extrapolation of failure probabilities to the design life | 25 |
| A.4 Example gear tooth bending strength reliability calculation..... | 26 |
| A.4.1 Example gear assumptions | 26 |
| A.4.2 Estimation of service life for defined failure probabilities | 26 |
| A.4.3 Extrapolation of failure probabilities to the design life | 28 |
| A.5 Example rolling bearing contact fatigue reliability calculation..... | 29 |
| A.6 Example shaft fatigue fracture reliability calculation | 29 |
| A.6.1 Example shaft assumptions..... | 29 |
| A.6.2 Estimation of life for the nominal failure probability | 29 |
| A.6.3 Extrapolation of service life for 10% failure probability | 30 |
| A.7 Example system reliability calculation | 31 |
| Annex B (informative) Application of the Weibull distribution to rolling bearing fatigue life | 32 |
| Bibliography..... | 35 |
