DIN EN 13155:2026-09 (E)

Cranes - Safety - Non-fixed load lifting attachments

Contents

Page

European foreword 8

Introduction 10

1 Scope 11

2 Normative references 12

3 Terms and definitions 14

4 List of significant hazards 22

5 Safety requirements and/or protective measures 48
5.1 General requirements 48
5.1.1 General 48
5.1.2 Mechanical load bearing parts 48
5.1.3 Controls 49
5.1.4 Handles 50
5.1.5 Requirements for slings which are integrated 50
5.1.6 Stability during storage 50
5.1.7 Quality of welding 50
5.2 Specific requirements for each category of attachment 51
5.2.1 Plate clamps 51
5.2.2 Vacuum lifters 51
5.2.3 Lifting magnets 53
5.2.4 C-hooks 55
5.2.5 Lifting forks 55
5.2.6 Lifting beams 56
5.2.7 Clamps 56
5.2.8 Lifting insert systems 57

6 Verification of the safety requirements and/or protective measures 59

7 Information for use 69
7.1 Instruction handbook 69
7.1.1 General information 69
7.1.2 Specific information 70
7.1.3 Guidance for maintenance 74
7.1.4 Verifications and inspections 74
7.2 Marking 74
7.2.1 Minimum marking 74
7.2.2 Additional marking 75
7.2.3 Additional safety plates 76

Annex A (normative) General verification methods 77

A.1 Verification of mechanical strength by calculation 77
A.2 Verification of mechanical strength on the type by a static test 77
A.2.1 Conditions 77
A.2.2 Procedure 77
A.2.3 Acceptance criteria 77
A.3 Verification of mechanical strength on each individual attachment by a static test 77

A.3.1 Conditions 77
A.3.2 Procedure 78
A.3.3 Acceptance criteria 78
A.4 Verification by inspection 78
A.4.1 Procedure 78
A.4.2 Acceptance criteria 78
A.5 !Verification of the calculated mechanical strength by test 78
A.5.1 General 78
A.5.2 Conditions 78
A.5.3 Procedure 79
A.5.4 Acceptance criteria 79

Annex B (normative) Verification methods for plate clamps 80

B.1 No detachment when the load is brought down and in case of impact 80
B.1.1 Conditions 80
B.1.2 Procedure 80
B.1.3 Acceptance criteria 80
B.2 Determination of the friction coefficient 80
B.2.1 Conditions 80
B.2.2 Procedure 81
B.2.3 Acceptance criteria 82
B.3 No slipping of the load - clamping by friction or penetration 82
B.3.1 Procedure 82
B.3.2 Acceptance criteria 83
B.4 Range of thickness of clamps 83
B.4.1 Conditions 83
B.4.2 Procedure 83
B.4.3 Acceptance criteria 83
B.5 Minimum working load 83
B.5.1 Conditions 83
B.5.2 Procedure 83
B.5.3 Acceptance criteria 83

Annex C (normative) Verification methods for vacuum lifters 84

C.1 Verification of pressure measuring device 84
C.1.1 Conditions 84
C.1.2 Procedure 84
C.1.3 Acceptance criteria 84
C.2 Verification of leakage indicator 84
C.2.1 Conditions 84
C.2.2 Procedure 84
C.2.3 Acceptance criteria 84
C.3 Verification of visibility of measuring device or indicator 84
C.3.1 Conditions 84
C.3.2 Procedure 84
C.3.3 Acceptance criteria 84
C.4 Verification of devices to compensate for vacuum losses 85
C.4.1 Conditions 85
C.4.2 Procedure 85
C.4.3 Acceptance criteria 85
C.5 Verification of warning device 85
C.5.1 Conditions 85
C.5.2 Procedure 85
C.5.3 Acceptance criteria 85
C.6 Verification of the non-return valve 85
C.6.1 Conditions 85
C.6.2 Procedure 85
C.6.3 Acceptance criteria 85
C.7 Verification of controls 86
C.7.1 Conditions 86

C.7.2 Procedure 86
C.7.3 Acceptance criteria 86
C.8 Verification of energy source failure warning system 86
C.8.1 Conditions 86
C.8.2 Procedure 86
C.8.3 Acceptance criteria 86
C.9 Verification of the position of the load 86
C.9.1 Conditions 86
C.9.2 Procedure 86
C.9.3 Acceptance criteria 86
C.10 Verification of adhesion force by calculation or testing 86
C.10.1 General 86
C.10.2 Verification by calculation 87
C.10.3 Verification by testing 88
C.11 Determination of the friction coefficient 88
C.11.1 Conditions 88
C.11.2 Procedure 89
C.11.3 Acceptance criteria 89

Annex D (normative) Verification methods for lifting magnets 90

D.1 Verification of tear-off force 90
D.1.1 Verification by pull test 90
D.1.2 Verification by flux measurement and calculation 91
D.2 Verification of controls 92
D.2.1 Conditions 92
D.2.2 Procedure 92
D.2.3 Acceptance criteria 92
D.3 Verification of back-up and warning devices 92
D.3.1 Conditions 92
D.3.2 Procedure 92
D.3.3 Acceptance criteria 92
D.4 Verification of the discharge time of batteries 92
D.4.1 Conditions 92
D.4.2 Procedure 93
D.4.3 Acceptance criteria 93
D.5 Verification of indicating devices 93
D.5.1 Conditions 93
D.5.2 Procedure 93
D.5.3 Acceptance criteria 93
D.6 Verification of alternative mechanical back-up devices 93
D.6.1 Conditions 93
D.6.2 Procedure 93
D.6.3 Acceptance criteria 93
D.7 Verification that the magnet is matched to the intended load(s) 94
D.7.1 Procedure 94
D.7.2 Acceptance criteria 94

Annex E (normative) Verification methods for lifting beams 95

E.1 Verification of locking or holding devices by testing 95
E.1.1 Conditions 95
E.1.2 Procedure 95
E.1.3 Acceptance criteria 96
E.2 Verification of the locking or holding by calculation 96

Annex F (normative) Verification methods for lifting forks 97

F.1 Verification of mechanical strength of the secondary positive holding device for lifting forks in horizontal direction 97
F.1.1 Conditions 97
F.1.2 Procedure 97

F.1.3 Acceptance criteria ... 97
F.2 Verification of mechanical strength of the secondary positive holding device for lifting forks in vertical direction ... 97
F.2.1 Conditions ... 97
F.2.2 Procedure ... 97
F.2.3 Acceptance criteria ... 97

Annex G (normative) Verification methods for clamps ... 98

G.1 Determination of the friction coefficient ... 98
G.1.1 Conditions ... 98
G.1.2 Procedure ... 98
G.1.3 Acceptance criteria ... 99
G.2 No slipping of the load - clamping by friction or penetration ... 99
G.2.1 Conditions ... 99
G.2.2 Acceptance criteria ... 100
G.3 Verification of mechanical strength of the secondary positive holding device for clamps in horizontal direction ... 100
G.3.1 Conditions ... 100
G.3.2 Procedure ... 100
G.3.3 Acceptance criteria ... 100
G.4 Verification of mechanical strength of the secondary positive holding device for clamps in vertical direction ... 100
G.4.1 Conditions ... 100
G.4.2 Procedure ... 100
G.4.3 Acceptance criteria ... 100
G.5 Range of thickness of clamps ... 101
G.5.1 Conditions ... 101
G.5.2 Procedure ... 101
G.5.3 Acceptance criteria ... 101

Annex H (normative) Verification methods for lifting insert systems ... 102

H.1 Verification of the embedment in concrete ... 102
H.1.1 Conditions ... 102
H.1.2 Procedure ... 102
H.1.3 Acceptance criteria ... 109
H.2 Individual verifications ... 111
H.2.1 Conditions ... 111
H.2.2 Procedure ... 112
H.2.3 Acceptance criteria ... 112

Annex I (informative) Selection of a suitable set of crane standards for a given application ... 113

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC aimed to be covered ... 115

Bibliography ... 118
