ISO 8579-1:2002-08 (E)

Acceptance code for gear units - Part 1: Test code for airborne sound

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Gear configuration and acoustic environment 2

5 Sound power level determination 3

6 Determination of emission sound pressure level 16

7 Installation and mounting conditions 17

8 Operating conditions during sound measurements 18

9 Information to be recorded 19

10 Information to be reported 19

11 Declaration and verification of sound emission values 19

Annex A (informative) Examples of microphone positions on the measurement surface for different gear types and sizes 20

Annex B (informative) Typical sound levels for different gear types and sizes (sound power and sound pressure) 29

Annex C (informative) Information for the determination of airborne sound power levels using the methods of ISO 3744:1981 and ISO 3746:1979 44
