

DIN EN 1804-3:2006-07 (Eng lisch)

Machines for underground mines - Safety requirements for hydraulic powered roof supports - Part 3: Hydraulic control systems

Contents		Page
Foreword		4
Introduction		5
2 Normative references		6
3 Terms and definitions		7
4 List of hazards		9
5 Safety requirements		11
5.1 General requirements		11
5.1.1 General		11
5.1.2 Hazard areas		11
5.1.3 Arrangement of the control devices		11
5.1.4 Dead man's control		11
5.1.5 Automatic hydraulic control system		11
5.1.6 Automatic guaranteed setting control		11
5.1.7 Shut-off devices		11
5.1.8 Pressure indicator		12
5.1.9 Pipe and hose assemblies		12
5.1.10 Hydraulic fluids		12
5.1.11 Lifting points		13
5.2 Design requirements		13
5.2.1 Protection against ejected fluids		13
5.2.2 Roof contact advance		13
5.2.3 Pressure limiting		13
5.2.4 Interruption of the operating pressure		13
5.2.5 Travel speeds		13
5.2.6 Actuating forces		13
5.2.7 Resistance to back pressure		13
5.2.8 Adjustable valves		14
5.3 Requirements of type A valves		14
5.3.1 General		14
5.3.2 Leaktightness		14
5.3.3 Yield pressure		14
5.3.4 Opening pressure		14
5.3.5 Closing pressure		14
5.3.6 Pressure pulses		14
5.3.7 Impact resistance		14
5.3.8 Pressure flow behaviour		14
5.3.9 Operating reliability		15
5.3.10 Temperature effects		15
5.3.11 Resistance to back pressure		15
5.4 Requirements for type B and C valves		15
5.4.1 General		15
5.4.2 Leaktightness		15
5.4.3 Resistance to pressure		15
5.4.4 Switching behaviour		15
5.4.5 Operating reliability		15
5.4.6 Resistance to back pressure		16

5.5	Requirements for type D valves	16
5.6	Materials	16
5.6.1	Metallic materials	16
5.6.2	Light metal	16
5.6.3	Other materials	16
5.6.4	Seals	16
6	Verification of the safety requirements	16
6.1	Type testing	16
6.2	Additional tests	17
7	User Information	18
7.1	General requirements	18
7.2	Technical and application data	18
7.2.1	Introduction	18
7.2.2	General description	18
7.2.3	Performance data	18
7.2.4	Hydraulic data	18
7.2.5	List of additional drawings and documents	19
7.3	Handling, transport and storage	19
7.3.1	Introduction	19
7.3.2	Handling and transport	19
7.3.3	Storage	19
7.4	Installation and commissioning	19
7.4.1	Installation	19
7.4.2	Commissioning	19
7.5	Operation	20
7.6	Maintenance	20
7.6.1	Introduction	20
7.6.2	Technical description	20
7.6.3	Maintenance instructions	20
7.6.4	Fault diagnosis and correction	20
7.6.5	Preventative maintenance schedules	20
7.7	Parts identification lists	21
7.8	Marking	21
7.9	Residual risks	21
Annex A (normative) Tests for verification of the safety requirements		22
A.1	Load tests	22
A.1.1	General	22
A.1.2	Lifting points	22
A.1.3	Testing of type A valves	22
A.1.4	Testing of type B valves	27
A.1.5	Testing of type C valves	30
A.1.6	Testing of type D valves	31
Annex B (normative) Deviations from EN 982:1996		32
B.1	General	32
B.2	5.1.7 (EN 982:1996)	32
B.3	5.3.4.1.3 Contamination control (EN 982:1996)	33
B.4	5.3.4.3.2 Failure (EN 982:1996)	33
B.5	5.3.6 Sequence control (EN 982:1996)	33
B.6	7.3.4.1 Non-electrical control mechanisms (EN 982:1996)	33
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of the EU Machinery Directive 98/37/EC		34
Bibliography		35
