ISO/TR 10064-5:2005-04 (E)

Cylindrical gears - Code of inspection practice - Part 5: Recommendations relative to evaluation of gear measuring instruments

Contents

Page

Foreword v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Instrument environment 2
4.1 Environment 2
4.1.1 Important parameters 2
4.1.2 Practical guidelines 3
4.1.3 Workshop environment 3
4.2 Effect of temperature on gears and artifacts 4
4.2.1 Profile temperature effect calculation 4
4.2.2 Helix temperature effect calculation 5
4.2.3 Tooth thickness temperature effect calculation 5

5 Measurement system condition 5
5.1 Evaluation procedure for generative instruments 6
5.1.1 Verification of mounting centres 6
5.1.2 Axial measuring slide verification 10
5.2 Evaluation procedures for CMM type measuring instruments 14
5.2.1 Performance test according to ISO 10360 14
5.2.2 Ball plate test 15
5.2.3 Rotary tables 16
5.3 Probe system 16
5.3.1 Stylus 16
5.3.2 Data recording system 17
5.4 Filtering 21
5.4.1 Mechanical filtering 21
5.4.2 Electrical filtering 21
5.4.3 Mathematical filtering 22
5.5 Uncertainty estimation 22

6 Artifacts 22
6.1 Mounting reference features 22
6.2 Suggested master artifacts 22
6.2.1 Integral base circle involute master 23
6.2.2 Helix artifact 23
6.2.3 Pitch variation, total cumulative pitch variation and runout artifact 24
6.2.4 Tooth thickness artifacts 25
6.2.5 Workpiece-like artifacts 25
6.3 Modified base circle involute artifact testing 27
6.4 Non-involute -- Pin (cylindrical), plane (flank) and ball (spherical) artifacts 27
6.4.1 Types of non-involute artifacts 27
6.4.2 Non-involute artifact function 29
6.4.3 Plane artifact calibration 30
6.4.4 Pin or ball artifact calibration 30
6.4.5 Probe-tip effects when calculating reference curve 30
6.4.6 Measurement location 31

6.4.7 Non-involute master interpretation ... 31
6.5 Helix artifact testing ... 31
6.5.1 Modified-lead helix artifact testing ... 31
6.5.2 Non-involute helix masters ... 32
6.6 Modified eccentricity pitch artifact testing ... 32

7 Uncertainty estimation guidelines ... 32
7.1 Uncertainty estimation methods ... 32
7.1.1 General methods ... 32
7.1.2 Comparator methods ... 33
7.2 Calculation of U95 measurement uncertainty ... 33
7.3 Measurement parameters ... 34
7.3.1 Line-fit parameters ... 34
7.3.2 Band-fit parameters ... 35
7.3.3 Pitch parameters ... 35

8 Measurement procedures ... 35
8.1 Traceability ... 35
8.2 Operating conditions ... 35
8.2.1 Conditions for bias determination ... 35
8.2.2 Conditions for standard uncertainty estimation ... 35
8.2.3 Conditions for combined determinations ... 36
8.3 Measurements ... 36
8.4 Calibration procedure ... 36
8.4.1 Initial set-up and adjustments ... 36
8.4.2 Initial calibration procedure ... 36
8.4.3 Ongoing calibration procedure ... 37
8.4.4 Tooling and gauges ... 37

9 Comparator measurement uncertainty estimation guidelines ... 37
9.1 Direct comparator example A ... 37
9.2 Comparator approach, expanded for workpiece characteristic influence ... 39
9.2.1 Comparator example B ... 39
9.2.2 Comparator example C ... 41
9.3 Comparator approach, expanded for workpiece characteristic and geometry similarity influences ... 43

10 Statistical process control ... 43
10.1 Definitions ... 43
10.2 Constructing the X and MR chart ... 43
10.3 Criteria for evidence of lack of control ... 44
10.4 When control chart data fails one or more criteria according to 10.3 ... 46

11 Instrument fitness for use ... 46
11.1 Limiting measurement uncertainty ... 46
11.1.1 GPS Tolerance reduction method ... 46
11.1.2 Tolerance ratio method ... 48
11.1.3 Instrument uncertainty guidelines ... 48
11.2 Measurement uncertainty sources ... 49
11.3 Reducing measurement uncertainty ... 50
11.3.1 Following a different calibration procedure ... 50
11.3.2 Reducing uncertainty of the reference master certification ... 50
11.3.3 Improving the measuring process ... 50

12 Measurement process (instrument) correlation ... 51
12.1 Basis for comparison ... 51
12.2 Correlation of measurement ... 51

Annex A (informative) Effect of temperature on gears and artifacts ... 52

Annex B (informative) Modified involute, helix, pitch artifact testing ... 58

Annex C (informative) Non-involute pin, ball, or plane (flank) artifact interpretation ... 69

Bibliography ... 89
