ISO/TR 11071-2:2006-04 (E)

Comparison of worldwide lift safety standards - Part 2: Hydraulic lifts (elevators)

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Terminology 1

3 Basis for lift safety standards development (basic assumptions) 5

4 Approach to design safety for hydraulic components 13

5 Driving Machines and jacks (plungers and cylinders) 33

6 Valves, Piping and Fittings 44

7 Ropes and chains 59

8 Capacity and loading 65

9 Spaces and clearances 75

10 Protection against free-fall, excessive speed and creeping 78

11 Electrical devices 83

Annex A (informative) Tabulations 88

Annex B (informative) References 113

Annex C (informative) CEN/TC10/WG1 N99 115
