DIN EN 500-4:2007-03 (E)

Mobile road construction machinery - Safety - Part 4: Specific requirements for compaction machines

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 List of significant hazards 8

5 Safety requirements and/or protective measures 8
5.1 Lighting, signalling and marking lights and reflex-reflector devices 8
5.2 Operation and handling 8
5.3 Operator's station 10
5.4 Operator's seat 10
5.5 Controls and indicators 10
5.6 Starting 10
5.7 Stopping 10
5.8 Access system to operator's station and to maintenance points 11
5.9 Hand-guards on explosion rammers 12
5.10 Roll-over protective structure (ROPS) 12
5.11 Noise and vibration 13

6 Verification of safety requirements and/or protective measures 13

7 Information for the user 14
7.1 Warning signals and devices 14
7.2 Instruction handbook 14
7.3 Marking 14

Annex A (normative) Braking systems for rollers with ride-on operators 15

Annex B (normative) Remote infrared controls for rollers with attending operator 20

Annex C (normative) Noise test code for hand-guided and remote-controlled vibratory ground compaction machines 23

Annex D (normative) Measurement of the hand-arm vibration of hand-guided vibratory ground compaction machines 33

Annex E (normative) Noise test code for rollers for ride-on operation 39

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EC Directive 98/37/EC 44

Bibliography 45

Figures Figure 1 -- Vertical swinging of single-drum walk-behind rollers 9

Figure 2 -- Position of the safety device at pedestrian-controlled rollers 9

Figure 3 -- Minimum clearance of lower limbs at access to the operator's station on machines with articulated steering 12

Figure 4 -- Deflection-limiting volume, front view, side view 13

Figure C.1 -- Arrangement of test positions for hand-guided machines 24

Figure C.2 -- Arrangement of test positions for remote-controlled machines 25

Figure C.3 -- Grading-size diagramme of the material to be compacted (gravel) 28

Figure C.4 -- Test site and arrangement with test track 29

Figure D.1 -- Directions of measurement and examples for attachment of the acceleration transducer 35

Figure D.2 -- Arrangement of the coupling device on the drawbar 36

Figure E.1 -- Basic length L 40

Figure E.2 -- Microphone positions 40

Tables Table A.1 -- Maximum force levels for brake-system controls for performance tests 18

Table A.2 -- Brake performance requirements working mode 19

Table C.1 -- Coordinates of microphones 26

Table C.2 -- Operating conditions 30

Table C.3 -- Uncertainties 30
