

# DIN EN 14985:2007-08 (E)

## Cranes - Slewing jib cranes

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	8
4	List of hazards .....	8
5	Safety requirements and/or protective measures .....	12
5.1	General .....	12
5.2	Requirements for strength and stability .....	12
5.2.1	Selection of classification parameters .....	12
5.2.2	Selection of loads and load combinations .....	12
5.2.3	Determination of factor 2 .....	12
5.2.4	Stall load condition .....	13
5.2.5	Loads caused by acceleration .....	14
5.2.6	Jib side loading .....	14
5.2.7	Test loads .....	14
5.2.8	Conditions of use of permissible stress method and limit state method .....	14
5.2.9	Stability of rail mounted cranes .....	15
5.3	Electrotechnical equipment .....	16
5.3.1	Physical environment and operating conditions .....	16
5.3.2	Electrical supply .....	16
5.3.3	External protective earthing and equipotential bonding .....	16
5.3.4	Supply disconnecting and switching off .....	16
5.3.5	Protection against electric shock .....	17
5.3.6	Conductors and cables .....	17
5.3.7	Control circuits and control functions .....	17
5.3.8	Operator interface and mounted control devices .....	18
5.3.9	Electronic equipment .....	19
5.3.10	Control gear - location, mounting and enclosures .....	19
5.3.11	5.3.11 Electrical requirements for the installation of load handling devices .....	19
5.3.12	Electric motors .....	19
5.4	Non-electrotechnical equipment .....	19
5.4.1	General .....	19
5.4.2	Braking systems .....	20
5.4.3	Hoisting mechanism .....	21
5.4.4	Luffing system .....	21
5.4.5	Slew mechanism .....	22
5.4.6	Travel mechanism .....	23
5.4.7	Gear drives .....	23
5.5	Limiting and indicating devices .....	24
5.5.1	Rated capacity limiters .....	24
5.5.2	Indicators .....	25
5.5.3	Motion limiters .....	25
5.5.4	Performance limiters .....	25
5.6	Protection against special hazards .....	26
5.6.1	Hot surfaces .....	26

5.6.2	Radio equipment .....	26
5.6.3	Laser beams .....	26
5.6.4	Fire hazard .....	26
5.6.5	Exhaust gases .....	26
5.6.6	Fuelling .....	26
5.7	Man-machine interface .....	26
5.7.1	Controls and control stations .....	26
5.7.2	Guarding and access .....	27
5.7.3	Lighting .....	27
5.7.4	Reduction of noise by design .....	28
5.8	Equipment for information and warning .....	29
5.8.1	General .....	29
5.8.2	Location of visual display units .....	29
5.8.3	Safety colour .....	29
5.8.4	Warning lights .....	29
5.9	Personal protection equipment .....	30
6	Verification of the safety requirements and/or protective measures .....	30
6.1	General .....	30
6.2	Fitness for purpose testing .....	33
6.2.1	General .....	33
6.2.2	Tests .....	33
7	Information for use .....	35
7.1	Instructions for installation and safe use .....	35
7.2	Driver's manual .....	35
7.3	User's manual .....	36
7.4	Instructions for regular checks, inspections and tests .....	37
7.5	Instructions for maintenance .....	37
7.6	Markings .....	38
8	Information to be obtained from the purchaser .....	38
Annex A (informative) Guidance for classification according to EN 13001-1 .....		39
Annex B (normative) Load combinations .....		47
Annex C (informative) Calculation of stall load factor for indirect acting lifting force limiter .....		48
Annex D (normative) Noise test code for slewing jib cranes .....		50
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 98/37/EC .....		56
Bibliography .....		57
