DIN 8902:2020-08 (E)

Pressure resistant circular sight glasses of soda-lime-glass

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Dimensions and designation 6

5 Material 7
5.1 General 7
5.2 Strength 7
5.3 Thermal properties 7
5.3.1 Mean coefficient of linear thermal expansion 7
5.3.2 Allowable minimum/maximum temperature TS 7
5.3.3 Thermal shock endurance 8
5.4 Chemical resistance 8
5.5 Material imperfections 8
5.5.1 Blisters 8
5.5.2 Knots and streaks 8
5.5.3 Crystalline inclusions 8

6 Finish 9

7 Limit dimensions, form and position tolerances, edge conditions 9
7.1 Limit dimensions 9
7.2 Tolerances of form and position 10
7.3 Chamfer on the sight glass 10

8 Testing 10
8.1 General 10
8.2 Thermal shock endurance 11
8.3 Dimensional deviations 11
8.4 Material imperfections 11

9 Marking 11

10 Packaging 12

11 Installation, safety requirements 13

Annex A (informative) Explanatory notes 14

A.1 Mechanical strength 14
A.2 Maximum application temperature 14
A.3 Chemical resistance 15

Bibliography 16

Figures Figure 1 -- Schematic diagram of a possible installation of a sight glass 6

Figure 2 -- Form and position tolerances, chamfer on a sight glass 9

Figure 3 -- Spaces for marking 12

Figure A.1 -- Loss in mass of sight glasses 15

Tables Table 1 -- Dimensions and maximum allowable pressure 6

Table 2 -- Permissible frequency of blisters 8

Table 3 -- Limit dimensions for diameter and thickness 9

Table 4 -- Flatness, parallelism 10

Table 5 -- Chamfer on the sight glass 10

Table 6 -- Dimensions of spaces for marking 12
