European foreword 5
1 Scope 7
2 Normative references 7
3 Terms and definitions, subscripts, special marks and symbols 7
3.1 Terms and definitions 7
3.2 Subscripts and special marks 17
3.2.1 Subscripts 17
3.2.2 Special marks 18
3.3 Symbols 18
4 Requirements for use of the calculation method 24
4.1 General 24
4.2 Geometry 24
4.3 Material 24
4.4 Loads 25
5 Calculation parameters 25
5.1 General 25
5.2 Flange parameters 25
5.2.1 General 25
5.2.2 Flange ring 26
5.2.3 Connected shell 27
5.2.4 Flexibility-related flange parameters 28
5.3 Bolt and washer parameters 29
5.3.1 General 29
5.3.2 Effective cross-section area of bolts 29
5.3.3 Flexibility modulus of bolts 29
5.3.4 Geometric parameters for washers and contact surfaces 29
5.3.5 Flexibility modulus of washers 30
5.4 Gasket parameters 30
5.4.1 General 30
5.4.2 Theoretical dimensions 30
5.4.3 Effective dimensions 30
5.4.4 Axial flexibility modulus of gasket 32
5.4.5 Lever arms 33
6 Forces 34
6.1 General 34
6.2 Applied loads 34
6.2.1 Assembly condition (I = 0) 34
6.2.2 Subsequent conditions (I = 1, 2 ...) 34
6.3 Compliance of the joint 35
6.4 Minimum forces necessary for the gasket 36
6.4.1 Assembly condition (I = 0) 36
6.4.2 Subsequent conditions (I = 1, 2, ...) 36
6.5 Internal forces in assembly condition (I = 0) 37
6.5.1 Required forces 37

6.5.2 Accounting for bolt-load scatter at assembly 38
6.6 Internal forces in subsequent conditions (I = 1, 2, ...) 38

7 Load limits 39
7.1 General 39
7.2 Bolts 40
7.3 Gasket 40
7.4 Integral flange and collar or stub 41
7.5 Blank flange 43
7.6 Loose flange on collar/stub 43

Annex A (informative) Dimensions of standard metric bolts 45

Annex B (informative) Tightening 46
B.1 Scatter of initial bolt load of a single bolt — Indicative values ε_{1-} and ε_{1+} for a single bolt 46
B.2 Scatter for the global load of all the bolts 46
B.3 Manual uncontrolled tightening 47
B.4 Assembly using torque wrench 47
B.5 Assembly using bolt tensioner 48

Annex C (informative) Flange rotations 50
C.1 General 50
C.2 Use of flange rotation 50
C.3 Calculation of flange rotations 50

Annex D (informative) Use of the calculation method 52
D.1 Calculation method principle 52
D.2 Mechanical model 53
D.3 Required checks 54
D.4 Calculation sequence 54

Annex E (informative) Gasket/flange face friction coefficients examples 57

Annex F (informative) Checking a specified assembly bolt force 58

Annex G (informative) Sealing gasket parameters when no leakage rate is specified 59

Annex H (informative) Alternative calculation procedure taking into account the plastic deformation of the gasket in subsequent load conditions procedures (after assembly) 60
H.1 General 60
H.2 Calculation procedure 60
H.2.1 General description 60
H.2.2 No additional plastic deformation 61
H.2.3 Additional plastic deformation 61
H.3 Flat gaskets 61
H.3.1 Flat gaskets with small or median deformations 61
H.3.2 Flat gaskets with greater deformations 63
H.4 Metal gaskets with curved surfaces (Figures 4b), c), e), f)) 64
H.5 Metal gaskets with octagonal section (Figure 4d)) 64

Annex I (informative) Available, incomplete models for conversion of the leakage rates in different conditions (based on certain flow models) 65
I.1 Introduction and warning 65
I.2 Flow theory fundamentals 65
I.2.1 Transport modes 65
I.2.2 Case of gases 66
I.2.3 Case of liquids: Parallel capillary model 67

I.3 Factors of influence on the leakage rate of gaskets and gasketed joints 67
I.3.1 List of identified factors 67
I.3.2 Limits and restriction of the proposed models 67
I.3.3 Dependence on pressure 68
I.3.4 Dependence on temperature 69
I.3.5 Dependence on the type of fluid 70
I.3.6 Influence of the gasket thickness 70
I.3.7 Influence of gasket width 71
I.3.8 Influence of gasket stress 71
I.3.9 Influence of other factors 72
I.3.10 Conclusion on the factors of influence 72
I.4 Practical application for EN 1591-1 calculations 72
I.4.1 General 72
I.4.2 Determination of a trend for the leakage rate for the flange connection in "actual" from "reference" conditions 74
I.4.3 Determination of a trend for the leakage rate for the flange connection in "reference" from "actual" conditions 75
Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2014/68/EU aimed to be covered 77
