ISO 21843:2023-01 (E)

Determination of the resistance to hydrocarbon pool fires of fire protection materials and systems for pressure vessels

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols 3

5 Principle 4

6 Test equipment 4
6.1 General 4
6.2 Burner arrangement 5
6.3 Fuel supply for burners 5
6.4 Test fluids 5
6.5 Test building 5

7 Calibration tests 5
7.1 General requirements 5
7.2 Calibration test vessel construction 6
7.3 Calibration test procedure 7
7.4 Analysis of test data 9
7.5 Requirements for successful calibration tests 9
7.6 Environmental conditions 10
7.7 Tolerances 10
7.8 Calibration and test report 11

8 Construction of fire test specimens 12

9 Instrumentation 12

10 Fire protection materials and systems 14
10.1 General 14
10.2 Applied fire protection materials 14
10.3 Assemblies and mounted fire protection systems 16

11 Test procedure 16

12 Termination of the test 17

13 Repeatability and reproducibility 17

14 Uncertainty of measurement 17

15 Test report 17

16 Practical application of test results 18

16.1 Pressure relief valve (PRV) 18
16.2 Propane (or alternative test fluid) fill level 19

17 Performance criteria 19
17.1 General 19
17.2 Substrate temperature 19
17.3 Coatings and spray-applied materials 19
17.4 Systems and assemblies 20

18 Factors affecting the validity of the test 20
18.1 Interruption of the test 20
18.2 Failure of TCs and DFTs 20
18.3 Failure of pressure transducers 21
18.4 Test-related tube and pipe 21
18.5 Variation in environmental conditions 21
18.6 Directional flame thermometer (DFT) results 21

19 Recommended classification procedures 22
19.1 General 22
19.2 Type of fire 22
19.3 Type of application 22
19.4 Classification based on temperature rise and period of resistance 22
19.5 Classification based on duration before failure 22

Annex A (informative) Example piping and instrumentation diagram for test facility 23

Annex B (informative) Directional flame thermometers (DFTs) 25

Annex C (normative) Method of affixing thermocouples 26

Annex D (informative) Radiation-convection (R-C) balance 27

Annex E (informative) Additional classification procedures: Classification based on duration before failure 29
