DIN EN 13445-11:2024-12 (E)

Unfired pressure vessels - Part 11: Additional requirements for pressure vessels of titanium and titanium alloys

Contents

Page

European foreword 4

1 Scope 5

2 Normative references 5

3 Terms, definitions, symbols and units 6

4 General requirements 6

5 Materials 6
5.1 General 6
5.2 Material specification 6
5.3 Material grouping system 6
5.4 Material documentation 6
5.5 Prevention of brittle fracture 7

6 Design 7
6.1 General 7
6.2 Corrosion, erosion and protection 7
6.3 Joint coefficient 7
6.4 Time-independent nominal design stress 7
6.5 Creep design 8
6.6 Shells under external pressure 9
6.7 Flanges 9
6.8 Fatigue design 9

7 Manufacture 10
7.1 General 10
7.2 Filler metals 10
7.3 Attachment of dissimilar metals 10
7.4 Backing strips, joggle joints and partial penetration welds 10
7.5 Qualification of welding procedure specifications (WPQR) 10
7.6 Qualification of welders and welding operators 10
7.7 Joint preparation 10
7.8 Execution of welded joints 11
7.9 Preheat 11
7.10 Permanent joints other than welding 11
7.11 Production test, reference criteria 12
7.12 Extent of testing 12
7.13 Performance of test and acceptance criteria 12
7.14 Forming procedures 12
7.14.1 Cold forming 12
7.14.2 Hot forming 13
7.15 Heat treatment after forming 13
7.15.1 General 13
7.15.2 Heat treatment of flat products after cold forming 13
7.15.3 Heat treatment of tubular products after cold forming 14
7.15.4 Heat treatment after hot forming 14
7.15.5 Annealing 14
7.16 Sampling of formed products 15

7.16.1 Cold formed products without heat treatment 15
7.16.2 Hot formed or cold formed products with heat treatment 15
7.17 Tests 16
7.17.1 Base material 16
7.17.2 Butt welds 16
7.18 Post weld heat treatment (PWHT) 16
7.19 Repairs 16

8 Inspection and testing 17
8.1 General 17
8.2 Non-destructive testing of welded joints 17
8.2.1 General 17
8.2.2 Demonstration of satisfactory experience for testing group 3 17
8.3 Determination of extent of non-destructive testing 18
8.4 Selection of non destructive testing methods for internal imperfections 21
8.5 Selection of non destructive testing methods for surface imperfections 21
8.6 Assessment of defects 21
8.7 Standard hydrostatic test 21

9 Finishing operations 22

Annex A (normative) Grouping system for titanium and titanium alloys 23

Annex B (informative) Designation of some titanium and titanium alloy materials 24

Annex C (informative) Materials 25

C.1 General 25
C.2 ISO material specifications 25
C.3 ASME and ASTM material specifications 25
C.4 DIN material specifications 26

Annex D (informative) Physical properties of titanium and titanium alloys 27

D.1 Definitions 27
D.1.1 Density 27
D.1.2 Poisson's ratio 27
D.2 Physical properties of titanium and titanium alloys 27
D.2.1 General 27
D.2.2 Polynomial coefficients 27
D.2.3 Figures for physical properties of titanium and titanium alloys 28

Annex E (informative) Creep data for unalloyed titanium 30

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of Directive 2014/68/EU aimed to be covered 31
