

DIN EN 13445-11:2024-12 (E)

Unfired pressure vessels - Part 11: Additional requirements for pressure vessels of titanium and titanium alloys

Contents		Page
European foreword		4
1	Scope	5
2	Normative references	5
3	Terms, definitions, symbols and units	6
4	General requirements	6
5	Materials	6
5.1	General	6
5.2	Material specification	6
5.3	Material grouping system	6
5.4	Material documentation	6
5.5	Prevention of brittle fracture	7
6	Design	7
6.1	General	7
6.2	Corrosion, erosion and protection	7
6.3	Joint coefficient	7
6.4	Time-independent nominal design stress	7
6.5	Creep design	8
6.6	Shells under external pressure	9
6.7	Flanges	9
6.8	Fatigue design	9
7	Manufacture	10
7.1	General	10
7.2	Filler metals	10
7.3	Attachment of dissimilar metals	10
7.4	Backing strips, joggle joints and partial penetration welds	10
7.5	Qualification of welding procedure specifications (WPQR)	10
7.6	Qualification of welders and welding operators	10
7.7	Joint preparation	10
7.8	Execution of welded joints	11
7.9	Preheat	11
7.10	Permanent joints other than welding	11
7.11	Production test, reference criteria	12
7.12	Extent of testing	12
7.13	Performance of test and acceptance criteria	12
7.14	Forming procedures	12
7.14.1	Cold forming	12
7.14.2	Hot forming	13
7.15	Heat treatment after forming	13
7.15.1	General	13
7.15.2	Heat treatment of flat products after cold forming	13
7.15.3	Heat treatment of tubular products after cold forming	14
7.15.4	Heat treatment after hot forming	14
7.15.5	Annealing	14
7.16	Sampling of formed products	15

7.16.1	Cold formed products without heat treatment	15
7.16.2	Hot formed or cold formed products with heat treatment	15
7.17	Tests	16
7.17.1	Base material	16
7.17.2	Butt welds	16
7.18	Post weld heat treatment (PWHT)	16
7.19	Repairs	16
8	Inspection and testing	17
8.1	General	17
8.2	Non-destructive testing of welded joints	17
8.2.1	General	17
8.2.2	Demonstration of satisfactory experience for testing group 3	17
8.3	Determination of extent of non-destructive testing	18
8.4	Selection of non destructive testing methods for internal imperfections	21
8.5	Selection of non destructive testing methods for surface imperfections	21
8.6	Assessment of defects	21
8.7	Standard hydrostatic test	21
9	Finishing operations	22
Annex A (normative) Grouping system for titanium and titanium alloys		23
Annex B (informative) Designation of some titanium and titanium alloy materials		24
Annex C (informative) Materials		25
C.1	General	25
C.2	ISO material specifications	25
C.3	ASME and ASTM material specifications	25
C.4	DIN material specifications	26
Annex D (informative) Physical properties of titanium and titanium alloys		27
D.1	Definitions	27
D.1.1	Density	27
D.1.2	Poisson's ratio	27
D.2	Physical properties of titanium and titanium alloys	27
D.2.1	General	27
D.2.2	Polynomial coefficients	27
D.2.3	Figures for physical properties of titanium and titanium alloys	28
Annex E (informative) Creep data for unalloyed titanium		30
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of Directive 2014/68/EU aimed to be covered		31
Bibliography		33
