

# DIN EN 13445-11:2024-12 (E)

## Unfired pressure vessels - Part 11: Additional requirements for pressure vessels of titanium and titanium alloys

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
1	Scope .....	5
2	Normative references .....	5
3	Terms, definitions, symbols and units .....	6
4	General requirements .....	6
5	Materials .....	6
5.1	General .....	6
5.2	Material specification .....	6
5.3	Material grouping system .....	6
5.4	Material documentation .....	6
5.5	Prevention of brittle fracture .....	7
6	Design .....	7
6.1	General .....	7
6.2	Corrosion, erosion and protection .....	7
6.3	Joint coefficient .....	7
6.4	Time-independent nominal design stress .....	7
6.5	Creep design .....	8
6.6	Shells under external pressure .....	9
6.7	Flanges .....	9
6.8	Fatigue design .....	9
7	Manufacture .....	10
7.1	General .....	10
7.2	Filler metals .....	10
7.3	Attachment of dissimilar metals .....	10
7.4	Backing strips, joggle joints and partial penetration welds .....	10
7.5	Qualification of welding procedure specifications (WPQR) .....	10
7.6	Qualification of welders and welding operators .....	10
7.7	Joint preparation .....	10
7.8	Execution of welded joints .....	11
7.9	Preheat .....	11
7.10	Permanent joints other than welding .....	11
7.11	Production test, reference criteria .....	12
7.12	Extent of testing .....	12
7.13	Performance of test and acceptance criteria .....	12
7.14	Forming procedures .....	12
7.14.1	Cold forming .....	12
7.14.2	Hot forming .....	13
7.15	Heat treatment after forming .....	13
7.15.1	General .....	13
7.15.2	Heat treatment of flat products after cold forming .....	13
7.15.3	Heat treatment of tubular products after cold forming .....	14
7.15.4	Heat treatment after hot forming .....	14
7.15.5	Annealing .....	14
7.16	Sampling of formed products .....	15

7.16.1	Cold formed products without heat treatment .....	15
7.16.2	Hot formed or cold formed products with heat treatment .....	15
7.17	Tests .....	16
7.17.1	Base material .....	16
7.17.2	Butt welds .....	16
7.18	Post weld heat treatment (PWHT) .....	16
7.19	Repairs .....	16
8	Inspection and testing .....	17
8.1	General .....	17
8.2	Non-destructive testing of welded joints .....	17
8.2.1	General .....	17
8.2.2	Demonstration of satisfactory experience for testing group 3 .....	17
8.3	Determination of extent of non-destructive testing .....	18
8.4	Selection of non destructive testing methods for internal imperfections .....	21
8.5	Selection of non destructive testing methods for surface imperfections .....	21
8.6	Assessment of defects .....	21
8.7	Standard hydrostatic test .....	21
9	Finishing operations .....	22
Annex A (normative) Grouping system for titanium and titanium alloys .....		23
Annex B (informative) Designation of some titanium and titanium alloy materials .....		24
Annex C (informative) Materials .....		25
C.1	General .....	25
C.2	ISO material specifications .....	25
C.3	ASME and ASTM material specifications .....	25
C.4	DIN material specifications .....	26
Annex D (informative) Physical properties of titanium and titanium alloys .....		27
D.1	Definitions .....	27
D.1.1	Density .....	27
D.1.2	Poisson's ratio .....	27
D.2	Physical properties of titanium and titanium alloys .....	27
D.2.1	General .....	27
D.2.2	Polynomial coefficients .....	27
D.2.3	Figures for physical properties of titanium and titanium alloys .....	28
Annex E (informative) Creep data for unalloyed titanium .....		30
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of Directive 2014/68/EU aimed to be covered .....		31
Bibliography .....		33
