DIN EN 14585:2024-12 (E)

Corrugated metal hose assemblies for pressure applications

Contents

Page

European foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 10

4 Classification 12

5 Materials 13
5.1 General requirement 13
5.2 Suitable materials 13
5.3 Other materials 16
5.4 Corrosion 16
5.5 Low temperature application 17
5.6 Materials for pressure-bearing parts of metal hose assemblies designed according to Categories I to III 18
5.6.1 General 18
5.6.2 Ductility 19
5.6.3 Brittle fracture 19
5.7 Material documentation 19
5.7.1 Materials according to SEP 19
5.7.2 Materials according to Categories I to III 19

6 Design methods 20
6.1 General 20
6.2 Basic design criteria 21
6.2.1 Design conditions 21
6.2.2 Temperatures 21
6.2.3 Additional loadings 21
6.2.4 Structural conditions 21
6.2.5 Dimensions 22
6.2.6 Design on the basis of nominal pressures PN 23
6.2.7 Application of the different design methods 24
6.3 Calculation design method 24
6.3.1 General 24
6.3.2 Allowable stresses 28
6.3.3 Corrugated metal hose 29
6.3.4 Braid 34
6.3.5 Metal hose assembly 37
6.3.6 Flanges and other end fittings 40
6.3.7 Calculation of fatigue 40
6.3.8 Validation tests 41
6.4 Experimental design method 41
6.4.1 General 41
6.4.2 Type approvals 41
6.4.3 Pressure test 41
6.4.4 Cyclic tests 42
6.5 Application of hose assemblies 46

6.5.1 General ... 46
6.5.2 Allowable pressure ... 46
6.5.3 Flow velocity ... 46
6.5.4 Pressure drop ... 47
6.5.5 Hose configurations ... 47
6.5.6 Documentation of the design methods ... 53

7 Manufacturing ... 54
7.1 General ... 54
7.2 Materials ... 54
7.2.1 General ... 54
7.2.2 Material traceability for hose assemblies ... 54
7.3 Permanent joints ... 54
7.3.1 General ... 54
7.3.2 Welding ... 55
7.3.3 Brazing ... 55
7.4 Metal hose assembly ... 56
7.4.1 Corrugated hose ... 56
7.4.2 Hose joining ... 56
7.4.3 Braiding ... 56
7.4.4 Additional protection ... 57
7.5 Tolerances ... 59
7.5.1 General ... 59
7.5.2 Inner diameter ... 59
7.5.3 Ply thickness ep ... 59
7.5.4 Corrugation height w ... 59
7.5.5 Overall length ... 59
7.5.6 End fittings ... 59
7.6 Repair and rework ... 59
7.7 Cleaning ... 60

8 Testing, inspection and documentation ... 60
8.1 Introduction ... 60
8.1.1 General ... 60
8.1.2 Documents ... 60
8.1.3 Documents for category I, II and III hose assemblies ... 60
8.2 In-process inspection, testing and documentation ... 60
8.2.1 Materials ... 60
8.2.2 Non-destructive in-process testing ... 61
8.3 Final assessment ... 61
8.3.1 General ... 61
8.3.2 Final inspection ... 61
8.3.3 Non-destructive testing ... 61
8.3.4 Visual and dimensional examination ... 62
8.3.5 Leak test ... 62
8.3.6 Proof test ... 62
8.3.7 Final documentation package ... 63
8.3.8 Packaging ... 64

9 Marking and labelling ... 64

10 Operating instructions ... 65
10.1 General ... 65
10.2 Content of operating instructions ... 65
10.3 Content of safety instructions ... 66

Annex A (informative) Categories of corrugated metal hose assemblies ... 67

Annex B (informative) Information to be supplied to the hose manufacturer ... 74

Annex C (normative) Material properties and derating factors ... 75

Annex D (informative) Calculation coefficients Cp, Cf, ... 80

Annex E (informative) Significant technical changes between this document and the previous edition 84

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2014/68/EU aimed to be covered 85
