# DIN EN 10344:2025-03 (E)

## Malleable cast iron fittings with compression ends for steel pipes

## Contents

Page

European foreword ..... 4

1 Scope ..... 5

2 Normative references ..... 5

3 Terms and definitions ..... 6

4 Types of fittings ..... 9

5 Materials ..... 9
5.1 General ..... 9
5.2 Material of the fitting body ..... 9
5.3 Elastomers ..... 9

6 Corrosion protection ..... 9
6.1 General ..... 9
6.2 Hot dip galvanizing ..... 10
6.2.1 General ..... 10
6.2.2 Chemical composition of the hot dip zinc coating ..... 10
6.2.3 Coating mass per surface unit and layer thickness ..... 10
6.2.4 Surface conditions of the hot dip zinc coating ..... 10
6.3 Non-metallic coating ..... 10
6.4 Dangerous substances ..... 11
6.4.1 General ..... 11
6.4.2 Hot dip zinc coating ..... 11
6.4.3 Dispatch conditions of finished fittings ..... 11
6.4.4 Non-metallic coating ..... 11

7 Design ..... 11
7.1 General ..... 11
7.2 Geometrical characteristics ..... 11
7.3 Minimum bore ..... 12
7.4 Pipe threads ..... 12
7.5 Surfaces ..... 12
7.6 Transition fittings ..... 12
7.6.1 Transition with jointing thread ..... 12
7.6.2 Transition for polyethylene pipe ..... 12
7.6.3 Transition for other pipes ..... 12
7.7 Load transmission ..... 12

8 Performance requirements ..... 13
8.1 Yield strength ..... 13
8.2 Tightness ..... 13
8.2.1 Internal pressure strength ..... 13
8.2.2 Leak tightness ..... 13
8.3 Pressure and temperature limits ..... 13
8.4 Dimensional tolerances ..... 14
8.5 Reaction to fire ..... 14
8.6 Durability ..... 14
8.6.1 Durability of fittings ..... 14
8.6.2 Durability of elastomeric seals ..... 14

8.7 Dangerous substances ..... 14

9 Test requirements ..... 14
9.1 General ..... 14
9.2 Component test ..... 16
9.2.1 Testing of malleable cast iron ..... 16
9.2.2 Testing of plastic components ..... 16
9.2.3 Testing of sealing materials ..... 17
9.2.4 Testing of hot dip zinc coating ..... 17
9.2.5 Analysis of polycyclic aromatic hydrocarbons ..... 17
9.2.6 Testing of non-metallic coating ..... 17
9.2.7 Material tests ..... 17
9.2.8 Visual inspection ..... 17
9.2.9 Geometrical characteristics ..... 18
9.2.10 Leak tightness of fitting body ..... 18
9.3 Assembly tests ..... 18
9.3.1 General ..... 18
9.3.2 Leak tightness under internal pressure ..... 18
9.3.3 Leak tightness under pressure cycling ..... 19
9.3.4 Leak tightness after repeated movements ..... 19
9.3.5 Resistance to pull-out ..... 22
9.3.6 Resistance to vibrations ..... 23
9.3.7 Leak tightness after temperature changes ..... 23
9.3.8 Behaviour in case of negative pressure (vacuum) ..... 23
9.3.9 Leak tightness under high temperature for gas installation inside of buildings ..... 24
9.3.10 Surface protection - Testing by salt spray test ..... 24

10 Assessment of conformity ..... 24

11 Designation of fittings ..... 25
11.1 Elements of the designation for ordering ..... 25
11.2 Additional notes on designation of size ..... 25
11.3 Examples of designation ..... 25

12 Marking ..... 26

Annex A (normative) Surface protection - Salt spray test ..... 27

Bibliography ..... 28
