DIN 6650-3:2006-09 (E)

Dispense systems for draught beverages - Part 3: Safety requirements for system components

Contents

Page

Foreword 3

1 Scope 3

2 Normative references 3

3 Terminology 4

4 Dimensions 5
4.1 Tubing connectors (connectors to taps of beverage containers) 5
4.2 Sockets for beverage containers 5
4.3 Container connectors 5

5 Safety requirements 5
5.1 General 5
5.2 Requirements for primary and secondary pressure regulators 5
5.3 Requirements for safety valves 6
5.4 Requirements for shut-off devices and diverters for pressure tubing 6
5.5 Requirements for pressure gauges (manometers) 6
5.6 Requirements for non-return valves for top pressure tubing 7
5.7 Requirements for tubing connectors and container connectors 7
5.8 Requirements for primary pressure tubing, manifolds and connectors 7
5.9 Requirements for top pressure tubing, manifolds and connectors 8
5.10 Requirements for tubes, manifolds and connectors for beverages and syrup 8
5.11 Requirements for liquid pumps 8
5.12 Requirements for mixers used to mix beverages and gases (e.g. carbonators) 8
5.13 Requirements for manual pumps 8
