DIN EN 14879-5:2007-10 (E)

Organic coating systems and linings for protection of industrial apparatus and pla nts against corrosion caused by aggressive media - Part 5: Linings on concrete components

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 7

4 Concepts and selection criteria 8
4.1 Surface protection types and systems 8
4.2 Selection criteria 9
4.3 Load profile 13

5 Concepts 13
5.1 Lining materials 13
5.2 Lining materials manufacturer 13
5.3 Applicator 13

6 Materials 13
6.1 Materials for bonded linings 13
6.2 Materials for mechanically fixed linings 15
6.3 Materials for loose linings 16

7 Application 17
7.1 Bonded linings 17
7.2 Mechanically fixed linings 18
7.3 Loose linings 20

8 Designations 21

9 Testing 21
9.1 General 21
9.2 Suitability testing 22
9.3 Checking the substrate 22
9.4 Receiving of lining materials 22
9.5 In-process testing of lining 22
9.6 Checking the completed lining 22
9.7 Tests during the application works 23
9.8 Inspection report 23

10 Suitability verification and tests 23
10.1 Requirements 23
10.2 Tests 26

Annex A (informative) 41

Annex B (informative) Selection criteria for surface protection systems 42

B.1 Load profiles and suitable surface protection systems for floors and walls 42

B.2 Load profiles and suitable surface protection systems for secondary containments 43
B.3 Load profiles and suitable protection for production plant floors 44
B.4 Load profiles and suitable protection for collecting basins, gutters, channels, pipes etc . 45
B.5 Load profiles and suitable protection for containers 46

Annex C (informative) Sample form for acceptance inspection report 47

Annex D (normative) Overview of verification of suitability for linings 48

Annex E (normative) Test fluid groups for verification of suitability for material/media combinations 49

Annex F (normative) Media lists for elastomer linings 52

Annex G (normative) Testing the dissipation capability 54

G.1 General 54
G.1.1 Dissipation resistance 54
G.1.2 Ground dissipating resistance 54
G.2 Testing the dissipation resistance of test samples 54
G.2.1 Instruments 54
G.2.2 Test procedure 54
G.2.3 Test report 54
G.3 Measuring the ground dissipation resistance on the laid surface protection system 55
G.3.1 Instruments 55
G.3.2 Preparation 55
G.3.3 Test procedure 55
G.3.4 Test report 56

Annex H (informative) Check list and sample form for inspection schedule 57

Annex I (informative) A-deviations 60

Bibliography 61
