

ISO 21439:2009-02 (E)

Clinical dosimetry - Beta radiation sources for brachytherapy

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Beta radiation sources and source data	8
4.1	Ophthalmic and dural brachytherapy sources	8
4.2	Intravascular brachytherapy sources	9
4.3	Characteristics of radionuclides	9
4.4	Source specification	9
5	Dose calculation parameters and formalisms	11
5.1	General	11
5.2	Radiation-field parameterization	12
5.3	Radial dose profile	13
5.4	Normalization of relative-dose data for seed sources	14
5.5	Adaptation of the TG-43/60 formalism for a long beta radiation line source	16
5.6	Reference data sets	17
5.7	Parameters for source uniformity characterization	17
6	Calibration and traceability	19
6.1	Measurand	19
6.2	Traceability	19
6.3	Reference point	19
6.4	Primary standards	19
6.5	Secondary standards	19
6.6	Transfer standards	19
6.7	Calibration of therapeutic beta radiation sources	20
7	Dose measurements in-phantom and measurement corrections	20
7.1	Measurements in water or a water-equivalent phantom	20
7.2	Detectors for beta radiation	21
7.3	Conversion of absorbed dose in solid phantoms to absorbed dose to water	22
7.4	Effective point of measurement in the detector	24
8	Theoretical modelling	25
8.1	Point-dose kernels	25
8.2	Monte Carlo simulation	26
9	Uncertainties in source calibrations	28
9.1	General	28
9.2	Uncertainty of primary standards	28
9.3	Uncertainty of secondary standards	28
9.4	Uncertainty of transfer standards	28
9.5	Relationship of dosimetry uncertainty to positional error	29
9.6	Uncertainty in theoretical modeling	29

10	Treatment planning and reporting	30
10.1	General	30
10.2	General aspects of treatment planning	30
10.3	Documentation in ophthalmic brachytherapy	30
10.4	Uncertainty of the dose delivered in ophthalmic brachytherapy	30
10.5	Documentation in intravascular brachytherapy	31
10.6	Reporting uncertainties in intravascular brachytherapy	33
11	Clinical quality control	33
11.1	Acceptance tests	33
11.2	Constancy checks	37
Annex A (normative) Reference data		38
Annex B (informative) Reference data sheet examples		43
Annex C (informative) Primary standards for beta radiation dosimetry		52
Annex D (informative) Detectors and phantom materials for clinical dosimetry of beta radiation brachytherapy sources		58
Annex E (informative) Monte Carlo calculations		68
Annex F (informative) Treatment planning		77
Bibliography		82
