ISO 28218:2010-10 (E)

Radiation protection - Performance criteria for radiobioassay

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 2

3 Terms and definitions 2

4 Symbols 6

5 Performance measures 7
5.1 Decision threshold (y*) and detection limit (y#) 7
5.2 Relative bias and bias performance criteria 10
5.3 Repeatability performance criteria 12

6 Performance criteria for in vivo radiobioassay 12
6.1 General 12
6.2 Responsibilities of the customer that could impact the service laboratory's performance 12
6.3 Service laboratory criteria 12
6.4 Identification of radionuclides 13
6.5 Quantification 13
6.6 Reporting results 14
6.7 Records retention 15

7 Performance criteria for in vitro radiobioassay 15
7.1 General 15
7.2 Responsibilities of the customer that could impact the service laboratory's performance 15
7.3 Analytical methodology 16
7.4 Reporting results 17
7.5 Records retention 17

8 Quality assurance and quality control for radiobioassay laboratories 18
8.1 General 18
8.2 Quality assurance 18
8.3 Quality assurance plan 19
8.4 Quality control 20

9 Performance testing programme 21
9.1 General 21
9.2 In vivo radiobioassay 22
9.3 In vitro radiobioassay 25

Annex A (informative) Detection limit -- Models for applications 29

Annex B (informative) Detection limit -- Application examples 32
