ISO 13304-2:2020 (E)

Radiological protection — Minimum criteria for electron paramagnetic resonance (EPR) spectroscopy for retrospective dosimetry of ionizing radiation — Part 2: Ex vivo human tooth enamel dosimetry

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Apparatus

4.1 Specifications for EPR spectrometer
4.2 Spectrometer sensitivity
4.3 Microwave bridge
4.4 Magnetic field
4.5 Microwave resonator

5 Preparation of tooth enamel samples

5.1 General
5.2 Applicable grain size

6 Measurement of the EPR spectrum

6.1 Description of spectrum
6.2 Applicable measurement parameters and conditions
6.2.1 General
6.2.2 Microwave power
6.2.3 Magnetic centre field
6.2.4 Magnetic field sweep width
6.2.5 Magnetic field sweep time
6.2.6 Time constant of signal channel receiver
6.2.7 EPR spectrum resolution
6.2.8 Conversion time of spectrum acquisition
6.2.9 Magnetic field modulation amplitude
6.2.10 Number of spectrum accumulations
6.2.11 Sample positioning and loading
6.2.12 Dependence of EPR signal intensity on sample mass
6.2.13 Use of standard samples
6.2.14 Number of measurement repetitions

7 Assessment of the RIS intensity

7.1 General
7.2 Intrinsic EPR signals from microwave resonator and sample tube

8 Irradiation of tooth enamel calibration samples for low linear energy transfer (LET) exposure

9 Conversion of the RIS intensity into an estimate of absorbed dose

10 Calculation of uncertainty on dose estimate

11 Minimum detectable dose

12 Confidentiality and ethical considerations

13 Laboratory safety requirements

13.1 General
13.2 Magnetic field safety requirements
13.3 Electromagnetic frequency requirements
13.4 Chemical safety requirements
13.5 Health risks from tooth samples
13.6 Optical safety requirements

14 Responsibility of the customer

15 Responsibility of the service laboratory

16 Quality assurance and quality control (QA and QC)

16.1 General
16.2 Performance checks
16.2.1 General
16.2.2 Performance checks by inter-laboratory comparisons
16.2.3 Performance checks of sample preparation
16.2.4 Performance checks of general measurement laboratory conditions
16.2.5 Performance checks of EPR spectrometer

17 Collection/selection and identification of samples

18 Transportation and storage of samples

19 Minimum documentation requirements
