DIN EN ISO 28057:2021-06 (E)

Clinical dosimetry - Dosimetry with solid thermol uminescence detectors for photon and electron radiations in radiotherapy (ISO 28 057:2019)

Contents

Page

European foreword ... **4**

Foreword ... **5**

Introduction ... **6**

1 Scope ... **7**

2 Normative references ... **7**

3 Terms and definitions ... **7**

4 Rules for the TLD measurement procedure ... **15**
4.1 Principle of measurement ... 15
4.2 Measured quantity ... 15
4.3 Measurement cycle ... 16
4.3.1 General requirements ... 16
4.3.2 Sequence of measurement cycles ... 16
4.3.3 Common passing of the measurement cycles ... 16
4.3.4 Handling of TL detectors ... 16
4.3.5 Pre-irradiation annealing ... 17
4.3.6 Irradiation ... 17
4.3.7 Post-irradiation annealing ... 17
4.3.8 Reading ... 17
4.4 Measurement of the absorbed dose to water ... 18
4.4.1 Basic formula for the determination of the absorbed dose to water ... 18
4.4.2 Determination of the background value, M_0 ... 18
4.4.3 Determination of the indicated value, M_i ... 19
4.4.4 Determination of the individual calibration coefficients, N_i ... 19
4.4.5 Determination of the correction factors, k_v ... 21
4.5 Uncertainty of measurement of the absorbed dose ... 28
4.6 Reusability ... 29
4.7 Stability check ... 29
4.8 Staff ... 29

5 Requirements for the TLD system ... **29**
5.1 General information ... 29
5.1.1 Classification of the requirements ... 29
5.1.2 Requirements for operation characteristics ... 30
5.2 Completeness of the TLD system ... 30
5.2.1 Technical components ... 30
5.2.2 Hardware and software components ... 30
5.2.3 Operating instructions ... 30
5.2.4 Access to a calibration irradiation device ... 32
5.3 Requirements for TL detectors ... 32
5.3.1 Characteristics of TL materials ... 32
5.3.2 Tailoring of TL materials ... 32
5.3.3 Reusability of TL detectors ... 33
5.3.4 Individual variation ... 33
5.4 Requirements for TL-indicating instruments ... 34
5.4.1 General remarks ... 34
5.4.2 Mechanical setup ... 34
5.4.3 Warm-up time ... 34

5.4.4 Indication and indication range 34
5.4.5 Background value 34
5.4.6 Overflow indication and effects during evaluation of high doses 34
5.4.7 Test light source 35
5.4.8 Changes in the response 35
5.4.9 Mechanical construction 35
5.4.10 Light shielding 35
5.4.11 Climatic influences 35
5.4.12 Electrical requirements 35
5.4.13 Operational safety and detection of function failure 36
5.4.14 Data output and data backup 38
5.5 Requirements for auxiliary instruments (pre-irradiation annealing device) 38
5.5.1 Pre-irradiation annealing 38
5.5.2 Construction 38
5.5.3 Electrical requirements 38
5.5.4 Operation safety 38
5.5.5 Detection of function failure 39
5.5.6 Indication of the operating state 39
5.6 Requirements for the entire TLD system 39
5.6.1 Minimum measuring ranges 39
5.6.2 Minimum rated ranges of use 39
5.6.3 Ranges of test parameters 40
5.7 Requirements for the calibration irradiation device 41
5.8 Requirements for the accompanying papers 41
5.9 Acceptance tests 41
5.9.1 General requirements 41
5.9.2 Number of TL detectors used 42
5.9.3 Type of TL detectors used 42
