ISO 23588:2023-02 (E)

Radiological protection - General requirements for proficiency tests for in vivo radiobioassay

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Planning 2
4.1 Determination of the type of proficiency test 2
4.2 Choice of measurement tasks 3
4.3 Selection of radionuclides 3
4.4 Selection of activity ranges 3
4.5 Choice of phantom 4
4.6 Announcement of the proficiency test 4

5 Preparation of phantoms and sources 5
5.1 Preparation of phantoms 5
5.2 Preparation of sources 5
5.3 Quality assurance 5

6 Conducting the proficiency test 5
6.1 General 5
6.2 Preparation of the phantom at the participant's facility 6
6.3 Measurement of the phantom by the participants 6
6.4 Reporting protocol 6

7 Data analysis and evaluation of results 7
7.1 General 7
7.2 Determination of the assigned value 7
7.3 Calculation of the performance scores 8
7.4 Report 8

Annex A (informative) Example schedule for a proficiency test 9

Annex B (informative) Example measurement tasks 10

Annex C (normative) MTL for in vivo radiobioassay performance testing 11

Annex D (informative) Examples of phantoms 12
