## Radiological protection - General requirements for proficiency tests for in vivo radiobioassay

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Planning .....	2
4.1	Determination of the type of proficiency test .....	2
4.2	Choice of measurement tasks .....	3
4.3	Selection of radionuclides .....	3
4.4	Selection of activity ranges .....	3
4.5	Choice of phantom .....	4
4.6	Announcement of the proficiency test .....	4
5	Preparation of phantoms and sources .....	5
5.1	Preparation of phantoms .....	5
5.2	Preparation of sources .....	5
5.3	Quality assurance .....	5
6	Conducting the proficiency test .....	5
6.1	General .....	5
6.2	Preparation of the phantom at the participant's facility .....	6
6.3	Measurement of the phantom by the participants .....	6
6.4	Reporting protocol .....	6
7	Data analysis and evaluation of results .....	7
7.1	General .....	7
7.2	Determination of the assigned value .....	7
7.3	Calculation of the performance scores .....	8
7.4	Report .....	8
Annex A (informative)	Example schedule for a proficiency test .....	9
Annex B (informative)	Example measurement tasks .....	10
Annex C (normative)	MTL for in vivo radiobioassay performance testing .....	11
Annex D (informative)	Examples of phantoms .....	12
Bibliography .....		13
