DIN EN ISO 19238:2023-12 (E)

Radiological protection - Performance criteria for service laboratories performing biological dosimetry by cytogenetics - Dicentric assay (ISO 19238:2023)

Contents

Page

European foreword **4**

Foreword **5**

Introduction **7**

1 Scope **8**

2 Normative references **8**

3 Terms and definitions **8**

4 Abbreviated terms **10**

5 Dicentric assay **11**

6 Responsibility of the requestor **12**

7 Responsibility of the service laboratory **12**
7.1 Setup and sustainment of the QA program 12
7.2 Responsibility during service 12

8 Confidentiality of personal information **13**
8.1 Overview 13
8.2 Applications of the principle of confidentiality 14
8.2.1 Delegation of responsibilities within the laboratory 14
8.2.2 Requests for analysis 14
8.2.3 Transmission of confidential information 14
8.2.4 Anonymity of samples 14
8.2.5 Reporting of results 14
8.2.6 Storage 14
8.2.7 Data security plan 14

9 Laboratory safety requirements **15**
9.1 Overview 15
9.2 Microbiological safety requirements 15
9.3 Chemical safety 15
9.4 Optical safety requirements 16

10 Sample processing **16**
10.1 Culturing 16
10.2 Scoring 17
10.2.1 Coding of samples and slides 17
10.2.2 Scoring techniques 17
10.2.3 Procedure for scoring first-division metaphases 17
10.2.4 Laboratory scoring expertise 18

11 Calibration curves **18**
11.1 Calibration source(s) 18
11.2 Establishment of calibration curve(s) 18

12 Criteria for converting a measured aberration frequency into an estimate of absorbed dose **20**
12.1 General 20
12.2 Testing the distribution of aberrations per cell 20

12.3 Comparison with the background level: Characterisation of the minimum detectable dose ... 21
12.4 Confidence limits on the number of dicentrics ... 23
12.5 Calculation of absorbed dose for whole-body exposures ... 24
12.6 Calculation of uncertainty on absorbed dose ... 24
12.7 Acute and non-acute exposure cases ... 25
12.8 Partial body and prior exposure cases ... 25
12.9 Other exposure scenarios ... 26

13 Reporting of results ... 27
13.1 General ... 27
13.2 Content of the report (see Annex C for a standard form) ... 27
13.3 Interpretation of the results ... 27

14 Quality assurance and quality control ... 28
14.1 Overview ... 28
14.2 Specific requirements ... 28
14.2.1 General ... 28
14.2.2 Performance checks by laboratory inter-comparisons ... 28
14.2.3 Periodical performance check of scorer qualification ... 29
14.2.4 Performance checks of sample transport integrity ... 29
14.2.5 Performance checks of sample integrity by service laboratory ... 29
14.2.6 Performance checks for instrumentation ... 30
14.2.7 Performance checks of sample protocol ... 30
14.2.8 Performance checks of sample scoring ... 30
14.2.9 Performance checks of dose and confidence limits estimation ... 30
14.2.10 Performance checks for result report generation ... 30

Annex A (informative) **Sample instructions for requestor ... 31**

Annex B (informative) **Sample questionnaire ... 33**

Annex C (informative) **Sample of report ... 35**

Annex D (informative) **Fitting of the low-LET dose-response curve by the method of maximum likelihood and calculating the error of dose estimate ... 37**

Annex E (informative) **Odds ratio method for cases of suspected exposure to a low dose ... 40**

Annex F (informative) **Decision threshold and detection limit ... 42**

Annex G (informative) **Sample data sheet for recording aberrations ... 45**

Bibliography ... 46
