ISO 20553:2025-01 (E)

Radiation protection - Monitoring of workers occupationally exposed to a risk of internal contamination with radioactive material

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 Symbols and abbreviated terms 6

5 Purpose and need for monitoring programmes 6
5.1 General aspects 6
5.2 Types of monitoring 7
5.2.1 Workplace monitoring 7
5.2.2 Individual monitoring 7
5.3 Categories of monitoring programmes 7
5.3.1 Routine monitoring programme 7
5.3.2 Special monitoring programme 8
5.3.3 Task-related monitoring programme 8
5.3.4 Confirmatory monitoring programme 8

6 Designing a routine monitoring programme 8
6.1 General requirements 8
6.2 Routine individual monitoring 9
6.2.1 General 9
6.2.2 Methods 9
6.2.3 Determining the frequency of monitoring 9
6.2.4 Methods and time intervals for commonly encountered radionuclides 11
6.2.5 Tolerances for monitoring intervals 16
6.3 Routine workplace monitoring 16

7 Designing a special monitoring programme 17
7.1 Special individual monitoring 17
7.1.1 General 17
7.1.2 In vivo measurements and in vitro analyses 17
7.1.3 Other techniques 17
7.2 Special workplace monitoring 18

8 Designing a task-related monitoring programme 18

9 Designingaconfirmatorymonitoringprogramme 18

10 Individualmonitoringinspecificcases 18
10.1 Monitoring of nuclear medicine and radiopharmacy staff exposed to short-lived radionuclides 18
10.2 Intakes of actinides 19
10.3 Intake via a wound 19
10.4 Intake through the intact skin 19

11 Investigation levels 19

12 Recording, documentation and reporting 20
12.1 Recording and documentation 20
12.1.1 General 20
12.1.2 Samples 20
12.1.3 Measurements 20
12.1.4 Dose assessment 21
12.2 Reporting 21
12.2.1 Routine monitoring programmes 21
12.2.2 Special monitoring programmes 22
12.2.3 Worker information 22

13 Quality management 22

Annex A (informative) Techniques and detection limits of in vitro bioassay or in vivo measurements selected to calculate routine monitoring time intervals for the radionuclides considered in Tables 1, 2, 3 and 4 23

Annex B (informative) Recommended methods for special monitoring programmes after inhalation 25

Bibliography 27
