

DIN EN ISO 20553:2025-05 (E)

Radiation protection - Monitoring of workers occupationally exposed to a risk of internal contamination with radioactive material (ISO 20553:2025)

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Symbols and abbreviated terms	6
5	Purpose and need for monitoring programmes	6
5.1	General aspects	6
5.2	Types of monitoring	7
5.2.1	Workplace monitoring	7
5.2.2	Individual monitoring	7
5.3	Categories of monitoring programmes	7
5.3.1	Routine monitoring programme	7
5.3.2	Special monitoring programme	8
5.3.3	Task-related monitoring programme	8
5.3.4	Confirmatory monitoring programme	8
6	Designing a routine monitoring programme	8
6.1	General requirements	8
6.2	Routine individual monitoring	9
6.2.1	General	9
6.2.2	Methods	9
6.2.3	Determining the frequency of monitoring	9
6.2.4	Methods and time intervals for commonly encountered radionuclides	11
6.2.5	Tolerances for monitoring intervals	16
6.3	Routine workplace monitoring	16
7	Designing a special monitoring programme	17
7.1	Special individual monitoring	17
7.1.1	General	17
7.1.2	In vivo measurements and in vitro analyses	17
7.1.3	Other techniques	17
7.2	Special workplace monitoring	18
8	Designing a task-related monitoring programme	18
9	Designing a confirmatory monitoring programme	18
10	Individual monitoring in specific cases	18
10.1	Monitoring of nuclear medicine and radiopharmacy staff exposed to short-lived radionuclides	18
10.2	Intakes of actinides	19
10.3	Intake via a wound	19
10.4	Intake through the intact skin	19
11	Investigation levels	19
12	Recording, documentation and reporting	20
12.1	Recording and documentation	20
12.1.1	General	20

12.1.2	Samples.....	20
12.1.3	Measurements.....	20
12.1.4	Dose assessment.....	21
12.2	Reporting.....	21
12.2.1	Routine monitoring programmes.....	21
12.2.2	Special monitoring programmes.....	22
12.2.3	Worker information.....	22
13	Quality management.....	22
Annex A	(informative) Techniques and detection limits of in vitro bioassay or in vivo measurements selected to calculate routine monitoring time intervals for the radionuclides considered in Tables 1, 2, 3 and 4.....	23
Annex B	(informative) Recommended methods for special monitoring programmes after inhalation.....	25
