## Neutron radiation protection shielding - Design principles and considerations for the choice of appropriate materials

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 <b>Scope</b> .....		1
2 <b>Normative references</b> .....		2
3 <b>Terms and definitions</b> .....		3
4 <b>Basic rules and principles for the definition of neutron shielding</b> .....		9
5 <b>Choice of radiological objectives and other design criteria</b> .....		11
6 <b>Characterization of neutron sources</b> .....		14
7 <b>Identification of constraints on placement and construction</b> .....		16
8 <b>Choice of materials</b> .....		18
9 <b>Choice of the calculation method</b> .....		23
10 <b>Choice of the final solution</b> .....		23
11 <b>Experimental verification</b> .....		23
<b>Annex A (informative) Considerations on neutron sources</b> .....		25
<b>Annex B (informative) Neutron sources and threshold reactions</b> .....		32
<b>Annex C (informative) Characteristics of the most common neutron shielding materials</b> .....		36
<b>Annex D (informative) Available computer codes for determination of neutron radiation protection shielding</b> .....		58
<b>Annex E (informative) Simplified shielding calculation method for neutrons produced by D-T reactions</b> .....		63
<b>Annex F (informative) Simplified neutron shielding calculation method</b> .....		66
<b>Bibliography</b> .....		75
