

ISO 9236-1:2004-02 (E)

Photography - Sensitometry of screen/film systems for medical radiography - Part 1: Determination of sensitometric curve shape, speed and average gradient

| Contents | | Page |
|---------------------------------------|--|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 1 |
| 4 | General requirements | 2 |
| 4.1 | Storage and handling conditions | 2 |
| 4.2 | Safelights | 2 |
| 4.3 | X-ray equipment | 3 |
| 4.4 | Air kerma meter | 3 |
| 4.5 | Processing | 3 |
| 4.6 | Densitometry | 4 |
| 5 | Determination of sensitometric curve shape | 4 |
| 5.1 | General | 4 |
| 5.2 | Beam qualities | 5 |
| 5.3 | Geometry for curve shape determination | 5 |
| 5.4 | Exposure | 8 |
| 5.5 | Evaluation | 8 |
| 6 | Determination of average gradient | 8 |
| 7 | Determination of speed | 10 |
| 7.1 | Definition | 10 |
| 7.2 | Beam qualities | 10 |
| 7.3 | Geometry | 13 |
| 7.4 | Exposure | 13 |
| 7.5 | Evaluation | 13 |
| 8 | Speed and average gradient determination without sensitometric curve | 16 |
| 9 | Uncertainty | 16 |
| 10 | Test report | 17 |
| Annex A (informative) Rationale | | 18 |
| Bibliography | | 20 |
