

ISO 21909:2005-06 (E)

Passive personal neutron dosimeters - Performance and test requirements

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
3.1	General terms	1
3.2	Quantities	2
3.3	Calibration and evaluation	3
3.4	Terms with respect to nuclear track emulsion dosimeters (NTED)	6
3.5	Terms with respect to solid state nuclear track dosimeters (SSNTD)	7
3.6	Terms with respect to thermoluminescence albedo dosimeters (TLAD)	7
3.7	Terms with respect to superheated emulsion dosimeters (SED)	8
3.8	Terms with respect to ion chamber dosimeters with direct ion storage (ICD)	9
4	Units	10
5	General test conditions	10
5.1	Test conditions	10
5.2	Reference radiation	10
5.3	Test requirements	10
6	Performance requirements	10
7	Test methods	15
8	Identification and accompanying documentation	16
8.1	Individual marking	16
8.2	Collective marking	16
8.3	Accompanying documentation	16
9	Certification	16
Annex A (normative) Reference and standard test conditions		17
Annex B (normative) Confidence limits		18
Annex C (normative) Performance tests		21
Annex D (informative) Irradiation conditions		38
Annex E (informative) Performance of neutron dosimeters		39
Annex F (normative) Conversion tables		48
Bibliography		49
