DIN EN 1708-1:2010-05 (E)

Welding - Basic welded joint details in steel - Part 1: Pressurized components

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Requirements 4
3.1 Selection of detail 4
3.2 Joint preparation (geometry and size) 5
3.2.1 General 5
3.2.2 Joint preparation geometry 5
3.2.3 Weld sizes 5
3.3 Presentation 5
3.4 Removal of internal sharp edges in branch bores 5
3.5 Preparation of holes in shell for set-through branches 6
3.6 Welds for smooth transition 6
3.7 Oblique and tangential branches 6

Tables Table 1 -- Butt joints of different thickness 7

Table 2 -- Branches without compensation rings 11

Table 3 -- Branches with compensation rings 23

Table 4 -- Sockets and couplings 25

Table 5 -- Flanges 27

Table 6 -- Jacketed vessels 31

Table 7 -- Tube to tube plate connection 42

Table 8 -- Flate end or tube plate to shell connections 46

Table 9 -- Internal diaphragms and separators 53

Table 10 -- Supports and non-pressure parts 54

Table 11 -- Special shell to head end connections 61

Table 12 -- Weld ring seal 62

Table 13 -- Pipe details 64
