DIN EN ISO 14920:2015-04 (E)

Thermal spraying - Spraying and fusing of self-fluxing alloys (ISO 14920:2015)

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Influence on the substrate and design 5
3.1 Substrate metal 5
3.2 Design 5

4 Spray material of the self-fluxing alloy 6
4.1 Selection 6
4.2 Composition 6

5 Preparation of the component 6
5.1 General 6
5.2 Methods of surface preparation 7
5.3 Cleanliness 7

6 Spray and fusion process 7
6.1 Spraying with simultaneous fusion 7
6.1.1 Procedure 7
6.1.2 Particle size and particle size range of the powder particles 7
6.1.3 Coating thickness 7
6.2 Spraying with subsequent fusion 8
6.2.1 Procedure 8
6.2.2 Particle size and particle size range of the powder particles 8
6.2.3 Coating thickness 8
6.3 Spraying technique -- Procedure 8
6.3.1 General 8
6.3.2 Preheating 8
6.3.3 Spraying 8
6.3.4 Fusing the deposit 9
6.3.5 Cooling 9

7 Final machining 9

8 Hardness testing 9
8.1 General 9
8.2 Standard hardness test 10

Annex A (informative) Reference values for the expected hardness of the fused coating 11

Bibliography 12
