DIN EN ISO 18278-3:2017-12 (E)

Resistance welding - Weldability - Part 3: Evaluation procedures for weldability in spot weld bonding (ISO 18278-3:2017)

Contents

Page

European foreword ... **3**

Foreword ... **4**

Introduction ... **5**

1 Scope ... **6**

2 Normative references ... **6**

3 Terms and definitions ... **6**

4 Weld bonding equipment ... **7**
4.1 General ... 7
4.2 Adhesive dispensing equipment ... 7
4.3 Storage chamber ... 7
4.4 Electrodes ... 7
4.5 Welding current ... 7
4.6 Mechanical settings ... 7
4.7 Measurement of parameters ... 7
4.7.1 Temperature ... 7
4.7.2 Amount of adhesive applied ... 7
4.7.3 Welding current and electrode force ... 8
4.7.4 Electrode cooling water flow rate ... 8
4.8 Measurement of results ... 8
4.8.1 Weld diameter ... 8
4.8.2 Detection of expulsion ... 8

5 Assembly preparation ... **8**

6 Preliminary adjustments ... **9**
6.1 Electrode alignment ... 9
6.2 Electrode conditioning ... 9

7 Determination of the welding current range ... **10**
7.1 Test specimens ... 10
7.2 Welding parameters ... 10
7.3 Test procedure ... 10
7.4 Current range criteria ... 10
7.5 Three sheet and multiple stack-ups ... 11

8 Estimation of electrode life ... **11**
8.1 Test specimens ... 11
8.2 Welding parameters ... 11
8.3 Procedure ... 11
8.4 Test criteria, interpretation of results ... 12

9 Test report ... **12**
9.1 General ... 12
9.2 Welding current range ... 13
9.3 Electrode life ... 13

Annex A (informative) **Electrode alignment** **14**
Annex B (informative) **Specimens with current shunt** **16**
Annex C (informative) **Specific conditions for steel sheet customer qualification** **18**
Annex D (informative) **Specimens for destructive testing** **21**
Annex E (informative) **Example of a test report for welding current range** **23**
Annex F (informative) **Example of a test report for electrode life test** **24**
Bibliography **25**
