DIN ISO 16338:2017-11 (E)

Welding for aerospace applications - Resistance spot and seam welding (ISO 16338:2017)

Contents

Page

National foreword ... **4**

National Annex NA (informative) **Bibliography** ... **5**

Foreword ... **6**

1 Scope ... **7**

2 Normative references ... **7**

3 Terms and definitions ... **7**

4 Symbols and abbreviated terms ... **10**

5 Specific engineering requirements ... **10**

6 Classification of the joint ... **10**

7 Production requirements ... **10**

8 Welding personnel requirements ... **11**

9 Person responsible for welding procedure qualification and welding machine qualification tests ... **11**

10 Material groups ... **11**

11 Preparation of parts to be welded ... **11**
11.1 General ... 11
11.2 Cleaning requirements ... 11
11.3 Surface coatings ... 12
11.4 Assembly ... 12

12 Equipment requirements ... **12**
12.1 Welding machines ... 12
12.2 Electrodes ... 12
12.3 Shear testing machines ... 12
12.3.1 General ... 12
12.3.2 Stationary shear testing machines ... 12
12.3.3 Portable shear testing machines ... 12
12.4 Jigs and fixtures ... 12

13 Welding machines ... **12**
13.1 Qualification requirements ... 12
13.1.1 General ... 12
13.1.2 Method of welding machine qualification ... 13
13.2 Test piece configuration and examination requirements ... 14

14 Welding procedure (WPS) ... **15**
14.1 Qualification requirements ... 15
14.1.1 General ... 15
14.1.2 Determination of weld settings ... 15
14.1.3 Methods of welding procedure qualification ... 15
14.1.4 Thickness combination limits ... 16
14.1.5 Welding procedure specification (WPS) ... 16
14.1.6 Welding procedure requalification ... 17
14.2 Test piece configuration and examination requirements ... 17

15 Quality requirements for production **19**
15.1 General 19
15.2 Production witness testing 19
15.2.1 General 19
15.2.2 Witness test specimens 19
15.2.3 Surface resistance 19
15.2.4 Parameter adjustments 19
15.2.5 Production witness test specimen configuration and examination 20
15.2.6 Alternate testing requirements in lieu of production witness testing 22
15.3 Production parts 22
15.3.1 Examination requirements 22
15.3.2 Deterioration of welding quality 22
15.3.3 Tack welds 22

16 Test pieces **22**
16.1 Standard test pieces 22
16.2 Test pieces for specific purposes 26

17 Examination, testing and acceptance criteria **26**
17.1 General 26
17.2 Visual examination 26
17.2.1 Visible imperfections in test specimens or production parts 26
17.2.2 Sheet separation between welded members 27
17.2.3 Electrode indentation 27
17.3 Radiographic examination 28
17.4 Metallographic examination 30
17.4.1 General 30
17.4.2 Electrode indentation 30
17.4.3 Internal imperfections 31
17.4.4 Nugget penetration 31
17.4.5 Nugget diameter or seam weld width 32
17.5 Mechanical testing 33
17.5.1 Spot welds — Sheet 33
17.5.2 Spot welds — Foil 37
17.5.3 Seam welds — Foil 37
17.5.4 Multiple members test specimen 37

18 Welding procedure qualification record (WPQR) **38**

Annex A (informative) **Machine qualification test report form** **41**

Annex B (informative) **WPS form** **42**

Annex C (informative) **Forms for welding procedure qualification record (WPQR) — Examples** **43**

Annex D (informative) **Commentary on machine qualification** **45**

Bibliography **48**
