DIN EN 1395-5:2018-10 (E)

Thermal spraying - Acceptance inspection of thermal spraying equipment - Part 5: Plasma spraying in chambers

Contents

Page

European foreword ... 3
1 Scope ... 4
2 Normative references ... 4
3 Terms and definitions ... 4
4 Principles of acceptance inspection ... 5
4.1 General ... 5
4.2 Typical components ... 5
5 Procedure for acceptance inspection of vacuum components ... 5
5.1 General ... 5
5.2 Low pressure performance of the pump station ... 6
5.3 Low pressure performance of the chamber ... 6
5.3.1 Preparation ... 6
5.3.2 Determination of the leakage rate (Q_L) ... 6
5.3.3 Assessment of leakage rate ... 7
5.4 Function test ... 7
6 Designation ... 8
7 Inspection report ... 8
Annex A (informative) Inspection report for chamber and pump systems for plasma spraying in controlled atmosphere (initial test/retest) ... 9
Annex B (informative) Diagram for the chronological sequence of the pressure change in chamber and an example for the calculation of the leakage rate ... 11
B.1 Diagram ... 11
B.2 Example for the calculation ... 12
