ISO 18785-4:2018 (E)

Friction stir spot welding — Aluminium — Part 4: Specification and qualification of welding procedures

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Development and qualification of welding procedures

- 4.1 General
- 4.2 Technical content of a pWPS
- 4.2.1 Manufacturer information
- 4.2.2 Composition of parent material
- 4.2.3 Dimensions of material
- 4.2.4 Welding method
- 4.2.5 Machine specifications
- 4.2.6 Tool identification
- 4.2.7 Clamping processes and conditions
- 4.2.8 Joint design
- 4.2.9 Joint preparation and cleaning methods
- 4.2.10 Welding technique
- 4.2.11 Post-weld processing

5 Qualification based on a welding procedure test

- 5.1 General
- 5.2 Standardized test piece
- 5.3 Welding of components, subscale test components or test specimens

6 Examination and testing

- 6.1 Visual testing
- 6.1.1 General
- 6.1.2 Re-testing
- 6.2 Destructive testing
- 6.2.1 General
- 6.2.2 Re-testing
- 6.3 Macrosection
- 6.4 Range of qualification
- 6.4.1 General
- 6.4.2 Related to the manufacturer
- 6.4.3 Related to the material
- 6.4.4 Common to all welding procedures
- 6.4.4.1 Welding process
- 6.4.4.2 Type of control method
- 6.4.4.3 Type of weld equipment
- 6.4.4.4 Welding tools
- 6.4.5 Other variables

7 Qualification based on pre-production welding test

- 7.1 General
- 7.2 Test pieces
- 7.3 Examination and testing of test pieces

7.4 Range of qualification
7.5 Welding procedure qualification record

Annex A (informative) Example format for a welding procedure specification

Annex B (informative) Additional variables to be considered in WPS's for FSSW variants

B.1 Refill FSSW
B.2 Stitch FSSW
B.3 Swept FSSW
B.4 Swing FSSW

Annex C (informative) Example welding procedure qualification record forms

C.1 Welding procedure qualification — Test certificate
C.2 Record of weld test
C.3 Test results
