DIN EN 13067:2020-11 (E)

Plastics welding personnel - Qualification of welders - Thermoplastics welded assemblies

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 7

3 Terms and definitions 7

4 Admission to the qualification tests 10

5 Testing of skill and knowledge 10
5.1 General 10
5.2 Practical test 10
5.3 Theoretical test 11
5.3.1 General 11
5.3.2 Questions 11

6 Duty of Plastics Welding Examiner and invigilator 18

7 Range of qualification 18

8 Welding of test piece 19
8.1 Difficulties and corrections whilst welding the test piece 19
8.2 Inspection requirements 19
8.3 Test piece 19

9 Test piece and test specimens, shapes and dimensions 19

10 Evaluation and acceptance criteria of test piece(s) and test specimens 28
10.1 General 28
10.2 Visual examination 28
10.3 Destructive tests 28
10.3.1 General 28
10.3.2 Bend test 28
10.3.3 Peel test 28
10.3.4 Tensile test 30
10.3.5 Visual examination of longitudinal cross-sections 31
10.4 Non-destructive tests -- High voltage test 31

11 Test result 31
11.1 Overall assessment 31
11.2 Practical test 32
11.3 Theoretical test 32

12 Failed test 32

13 Period of validity 32
13.1 Initial qualification 32
13.2 Prolongation 32

14 Qualification renewal 32

Annex A (informative) Welding record sheet - Heated tool butt welding of pipes 33

Annex B(informative) PWE evaluation sheet for practical test 34

B.1 Welding process: Hot gas round nozzle - Hot gas speed 34
B.2 Welding process: Extrusion welding 36
B.3 Welding process: Heated tool butt welding 38
B.4 Welding process: Heated tool socket welding - Heated tool saddle welding 40
B.5 Welding process: Electrofusion socket welding - Electrofusion saddle welding 41
B.6 Welding of lining membranes 42
B.7 Welding process: Solvent welding 46
